NEWS ITEMS CONDENSED

Mrs. Julia McCloud, of Belleville, celebrated her ninety-seventh birthday on Thursday of last week.

The population of the county of Prince Edward, has actually decreased to the extent of seven hundred people in the last ten years.

William Topping, while playing in the Newburgh public school grounds, slipped on the ice and fell, his leg striking the door step, and breaking it below the knee.

The friends of Mr. and Mrs. Well Stewart are pleased to hear that Mrs. Stewart has purchased her father's farm (the late Hugh Saul), and will reside at Camden East, where they have such a large circle of friends.

A school teacher in a town not far from Tweed, had been very strict in requiring written excuses from the parents of children in case of absence. The morning of the big snow storm a large number of the smaller pupils did not put in an appearance at school, and on the following day all came with written excuses except one tot named Willie, who, when asked for his excuse said, "I did ferdit it." He was cautioned to bring it next day. Willie's mother was disgusted. It seemed to her that anyone with the slightest pretensions to gray matter ought to know the reason for his absence. The next morning he arrived all rosy with the cold, and handed the teacher his excuse. It read: "Dear Miss C., little Willie's legs are fourteen inches long. The snow was two feet deep. Very truly yours Mrs. J."

Toronto, March 19.—Justice Middleton, at Osgoode hall, gave judgment constructing the will of the late John Reid, of Camden township, county of Lennox and Addington, who died on January 11th, 1903. In his will the deceased left \$150 to each of four daughters to be paid them on arriving at the age of twenty-one. The residue of the estate was left to a fifth daughter, Augusta Beryle McLaren. The will provided that the legacies to the four daughters should be a charge against certain real estate in the township that he had left to his daughter, Augusta. On the death of two of the daughters, before reaching the age of twenty-one, there was left the sum of \$300 to be divided. On behalf of the remaining infant and a son, John W. Reid, application was made to have the \$300 divided in equal proportions amongst the four surviving children. Justice Middleton made an order to this effect and charged the costs of the entire action against the daughter, Augusta, she having failed to pay the \$75 to her two sisters and brother though requested to do so. His lordship regrets that such trifling sums should have been the cause of an action in court.

Received and filed.

Mr. E. J. Roy, representing the Rock Drill Foundry Co., addressed council. When they start on the work of their new buildings considerable water will be needed, and he asked that the council use their influence to get permission from the Canning Factory Co., to tap their water main for this purpose.

Reeve Alexander stated that he would use his influence to get the permission asked for by Mr. Roy.

A communication was read from Mr. Paul, M. P., thanking the council for their kind words of approval of his efforts in regard to dredging the river. He also expressed the opinion that the efforts put forth would bring the needed results. Filed.

A communication was read from the Sawyer Massey Co., Hamilton, stating that the business in connection with the purchase of the road roller had been satisfactorily arranged. Also that they had forwarded the "idler" for the roller, and when the time arrived for testing it they would be pleased to send an expert man for that purpose. Filed.

The McNeill estate, part of which is the Campbell House, is indebted to the town to the amount of \$25 for opening and cleaning a sewer leading from that building. The managers of the estate refuse to pay, saying the tenant ought to settle the account, and the tenant says the estate has paid for remedying the said evil once or twice before, and ought to do so in the present case. And thus the case stands.

Referred to the Poor and Sanitary to investigate and report.

A communication was received from the Canadian Consolidated Rubber Co., in regard to prices for fire hose, etc.

Referred to the Fire, Water and Light Committee.

The Fire, Water and Light Committee reported concerning the placing of two hydrants for the extension of water main for supplying water to the Dominion Rock Drill Foundry Co. They recommended that the water main at the corner of Graham and Centre streets be extended north to Ann street, and westerly on Ann street to Robert street, the first hydrant to be placed six hundred feet from the corner of Graham and Centre streets, and that the second hydrant be placed on the corner of Ann and Robert streets.

Report adopted.

A by-law was introduced for the purpose of amending the dog by-law. The amendment means that in future a tax of \$1.00 will be levied on owners who own one dog, and \$2 for each additional dog owned or harbored; \$3 for one bitch and \$5 for each additional bitch owned or harbored. Also that all dog taxes must be paid before the first of May in each year, and Chief of Police Graham will have charge of the collection of tax, and enforcing the by-law.

The Council as a committee of the whole reported progress. The amendments will be drafted in a new by-law and passed at the next session.

In reference to the by-law governing the sale of milk the Printing and By-law Committee were given further time to report.

A by-law was introduced for the appointment of a Medical Health Officer.

THE REASONS FOR HIGH TAXATION.

At the regular meeting of the town council on Monday evening the rate of taxation for the year 1912 was struck at 29 1/2 mills. To the average ratepayer this will look like taxation with a vengeance, and the members of the council will in consequence get many a hard rap.

But the question which every ratepayer should ask before handing out any adverse criticism is, "could this council have done better?"

For the benefit of the ratepayer who is not familiar enough with the finances of the town to read between the lines and figure out the cost of the extra high rate of taxation for this year we purpose to show the reasons. In our humble opinion, and in all fairness to the citizens who compose the council board, we believe that it was impossible for a lower rate under the circumstances.

Among the items of estimated expenditure will be found the following items, over and above the usual expenditure, and the council had no alternative but to make provision for them:

Road roller.....	\$1096 75
Dominion Rock Drill Foundry Co., site and laying water pipe.....	800 00
Fire alarm and maintenance.....	535 00
Merchant's Bank overdraft.....	4250 22
School board, 2 mills more than last year which means about.....	2400 00
	\$9090 97
Uncollected taxes on 1911 roll	2442 55
	\$6648 42

Last year the rate of taxation was 24 mills, and deducting the amount of uncollected taxes on the 1911 roll from the overdraft in the Merchant's Bank and we find that last year taxes lacked nearly two mills of producing enough money to run the town for that year. This year's council has to provide for that deficiency.

Then the Board of Education in their requisition asks for two mills more than last year. That makes nearly four mills more than last year.

Then take the other items, road roller \$1096.75, site and laying water pipe for the Rock Drill Foundry Co., \$800.00, Fire alarm and maintenance \$535.00, and we find that another two mills is required.

Taken altogether this means that about six mills extra were required for this year and some tall figuring had to be done to figure it down to 29 1/2 mills.

These deductions are not given as being accurate to a cent, but are calculated to give the tax payer an idea of the cause for the extra high rate this year.

Horse clipping machines, horse clippers, horse brushes, sweat collars and horse covers. The best horse and

home after attending the funeral of
her father, Mr. McDermott, of Tyen-
dinaga.

Mr. and Mrs. J. E. Fitzgerald, of
Melrose, and Mr. and Mrs. John Mc-
Laughlin, of Forest Mills, spent Thurs-
day last the guests of Daniel Foley.

Stanley Maloney spent Sunday at
his home in Stoco.

School is progressing favorably
under the able management of the
two teachers.

DENBIGH.

Mn. Joseph Youmans and family,
who have resided here nearly all their
lives, left Denbigh last Monday and
moved on their newly acquired farm
near Tweed, but they had to leave
their daughter, Anna, behind, who
fell seriously ill about a week ago, and
will not be able to stand the journey
for some time although she is steadily
improving.

Mrs. Dr. Adams, Mr. and Mrs. P.
Stein, and Mr. Oscar Chatson are on
the sick list and there are quite a
number of others in the vicinity who
are suffering from La Grippe or severe
colds.

Mr. Norman Cranshaw, of Windi-
gate, Man., who spent a month or so
here, visiting his parents and other
relatives and former neighbors, in-
tends to return to his western home
next week.

Mr. Robert Thompson, a former
Denbigh citizen, who has lately re-
sided at Tweed, arrived here to pay a
farewell visit to his numerous rela-
tives here, previous to his leaving for
the northwest where his family has
already preceded him.

Mr. Hugh Pettifer, who has been in
New Ontario for some time, is home
with his family now disposing of his
property and making arrangements to
move with his family up to New
Liskeard.

Miss Hulda Marquardt, of Hard-
wood Lake, who has for a couple of
months been staying with her uncle,
Mr. P. Stein, intends to return home
this week as her mother is reported to
be ill.

Mr. M. R. Reid, of Sharbot Lake, I.
P. S., was making one of his official
visits to our public school last week.

An alarming rumor is published in
Le Devoir regarding the design of the
Quebec bridge. It is not credible that
engineering knowledge regarding the
weight and strength of structural steel
would be disregarded a second time.

The work of erecting the new C.N.R.
bridge on the Bay of Quinte line at
Yarker, will be commenced shortly.
The derrick and some of the construc-
tion tools arrived last week. The new
structure will be seven spans long.

LUNCHES AT ALL HOURS

Linked by Fate

BY CHARLES GARVICE

Author of "The Verdict of the Heart," "A Heritage of Hate," "Nell of Shorne Mills," "Paid For," "A Modern Juliet," Etc.

"No," she said. "Why should I? There is no one here but ourselves."

It was out—had slipped out at last—and she went pale, then red; but she turned away swiftly, and he did not notice her embarrassment.

"I thought you might get lonely," he said, simply. "I have not been so far away before. Perhaps I ought to have made the exploration before this. I shall set up another signal on the north, though I am convinced that no ships pass that way. I remember—it's wonderful how things come into your memory when you think they have gone forever!—seeing these islands—or what I think were them—in a map at home."

"Yes," she said, mechanically; for she was wondering where his "home" was. Should she ask him? It was haunting and burdensome; this complete ignorance of his past history, his very identity. But before she could find courage to put her question he went on:

"I believe the mainland of Australia is behind us, so to speak, but I'm not sure." He sighed as if impatient of his ignorance. "It is just possible some traders may drop in on us; on the other hand we may be left—"

He had been communing with himself as much as talking to her; and as he suddenly realised that he was talking aloud, he glanced at her penitently. But there was no sign of grief or pain on the beautiful face, and she said, quite calmly:

"There is nothing for it but patience."

"Yes," he sighed.

She moved about in the quiet, soothing way some women—bless them!—possess naturally, then, presently, she looked round as if everything were done, and said, quietly:

"Is there anything else I can do—anything else you want? If not, I will go."

"No, thank you!" he replied as quietly. He rose and opened the door for her, as if they were parting for the night in a house in Mayfair, and, drawing her cloak round her, she passed him.

"Good night," she said, and "Good night," he responded.

He waited by the open door until he had seen her enter the hut, then he closed the door and lay down by the fire. He could not sleep that night in the hut he and Fleming had occupied; it was too full of memories of his fellow-castaway and friend.

When he rose next morning and went to the door he saw Nina running toward the men's hut. She stopped short at sight of him and seemed to hesitate; then, after a pause, she came on.

She was panting a little and the color was coming and going on her face, fresh as the morning itself and as beautiful.

"You gave me a fright!" she said, as if explaining. "I went to the hut to call you and could not make you

should be found and rescued. Put them in a heap—oh, better bury them! I'll get the spade."

"Oh, don't trouble!" she said; "I'll put them somewhere."

"I wish they were coal," said Manning, eyeing them thoughtfully and complainingly.

"Or potatoes or pots of marmalade or—oh, fifty other things I want!" she sighed.

"Never mind," he said, soothingly. "Perhaps I shall find some coal; the marmalade is hopeless, I'm afraid. Good morning. Can I help you move the heavy things?"

"Oh, no, no, thanks!" she returned quickly—it seemed to him nervously, as if she did not wish him to enter her hut—and, with another nod, he shouldered his gun and went off.

CHAPTER VI.

Nina finished her own "spring clean" and, the strain being relaxed, began to feel lonely.

It was perhaps for the best, in some respects, that he should go off for the day; it lessened the embarrassment of the situation; but she thought rather wistfully of the hours she must spend in solitude.

And to pass them she resolved to rearrange his own hut. Sleeping in the men's was not nearly so comfortable for him, and—besides he was farther away from her than in the cabin he and Fleming had occupied; and though she was not nervous, she was conscious that she liked to have him within call.

She went down to the hut after awhile, and entered it shyly and hesitatingly. Her woman's sense of neatness and order was shocked by the untidiness of the place, and she set to work to clear and rearrange it. While she was folding and packing Fleming's few belongings and putting them in a box, she came across the kind of diary "log" he had kept on board the Alpina. She sat down and turned its pages and found several references to herself and Manning. One of them caught her attention, and she pondered over it. It ran thus:

"The fellow-passengers I like best are a Miss Vernon—her Christian name may be Christina; she is called Nina by her father. She is a very lovely and lovable girl. Her father, a doctor, has come out for change and rest. He is a savant of the old school, a learned and an absent-minded man. She is, I am sure, as good as she is beautiful, and her light-heartedness and amiability have done much to make the voyage so far a delightful one. I walk and talk with her frequently. How happy will be the man who is fortunate enough to win her love!"

Nina blushed at this assertion, and looked up from the diary with a sigh. Then she read on:

"The other is a man named Vane Manning. I have 'made friends' with him, though it was rather difficult."

surely it was her duty to place and make it comfortable was the least she could do who did so much for her.

She did away with "bed," and altered the of the rough furniture so of the room as different as possible, and she completed by putting on the table gloriously-colored flowers in an empty bottle. While she up the posy her eyes a signet ring which Mann placed on her finger for ring. Be sure it was not time she had looked at it seemed to her that even she had been conscious sence. But now, after r paragraph in Fleming's viewed it with a feeling against the Fate that had there; and, obeying a sudden she took it off and slipped pocket.

The moment she had done was vaguely sorry; she n thing; her finger looked "unclad" without it. But too proud to put it on it should not remind him that he glanced at her h unwelcome tie which bou her.

It was late before Mann slowly over the hill and saloon—as Nina had decided the men's hut—and, as sh him, she saw that he was Now she had on her best one she had been mend Fleming came to propose riage to her. One was painting a little and the color was coming and going on her face, fresh as the morning itself and as beautiful.

"You gave me a fright!" she said, as if explaining. "I went to the hut to call you and could not make you hear—"

"I slept here," he said. "Why, where did you think I had gone?"

She dropped her eyes. "I didn't know. I thought you might be ill," she said, rather coldly. "Breakfast is ready. I'll bring it."

He had his morning swim in the sunlit bay, and returned to find the breakfast laid. But she did not sit down with him.

"I have had mine," she said, as she gave him some really well-cooked fish and the remains of the duck. "There is some lunch to take with you. Dinner at seven, I suppose?"

"Yes; I'll be back by then. You always remember to wind up your watch? That's right."

"I shall want some more birds today," she said.

"I'll get them before I go," he responded. "Is there anything else?"

"No, thanks. I'll leave you now. I am very busy turning out my hut."

After he had finished his breakfast—it was not so pleasant a meal as that of last night; he missed her—he took his gun and went down to the piece of marsh where he usually found the ducks. It went to his heart to shoot them, for, being unacquainted with the tender mercies of men, they were friendly and unafraid, and, being a sportsman, he had to frighten them on to the wind before he fired.

He got a couple of brace and went up to her hut with them. It was the first time he had approached her quarters since Fleming's death. She was standing outside in the midst of a fairly good imitation of a "spring clean," and she paused in her task and regarded his approach with a touch of color in her cheeks and a certain coldness in her eyes.

"Sorry to interrupt you," he said in a matter-of-fact way. "Here are the ducks."

"Thank you," she said. "Will you put them on the ground, please? Oh"—as he obeyed her and was walking away—"what shall I do with these?" pointing to a small heap of stones. "They are the stones father found."

Mannerling nodded.

"Yes; they are gold," he said, regarding them with indifference. Then he smiled. "Gold! It's strange to think that if we were within reach of the world and civilization you would be rich—rich 'beyond the dreams of avarice.'"

"We, you mean," she corrected him, with a smile.

Then the blood burnt in her veins, for it flashed upon her that he would think she had remembered and referred to the fact that they were man

and wife and held things in common.

But Mannerling, with a man's dullness, took her literally.

"No," he said. "You forget that your father found it, and that you are his daughter and heiress."

"Oh—yes," she said, casually. "Well, what shall I do with them? They are in the way and make my room untidy."

"Pitch them anywhere," he replied. "They are of no use, unless we

to win the love!"

Nina blushed at this assertion, and looked up from the diary with a sigh. Then she read on:

"The other is a man named Vane Mannerling. I have 'made friends' with him, though it was rather difficult to do so at first, for though he is by no means morose, he is somewhat taciturn and reserved. He is a gentleman and distinguished looking—which some gentlemen are not. In addition to great physical advantages, he has a remarkably pleasant voice, deep and musical. He does not 'mix' with the other passengers, and is given to walking and sitting by himself. I consider myself favored by his liking, if the word is not too strong; at any rate, he does not shun me, and is even willing to stroll about the deck and chat. If I were a novelist I would construct a romance round him; it seems to me that he is just the kind of man who may have had what the lady writers call 'a past.' I don't mean a guilty past; no, there is something about him which impresses me with a sense of his worthiness. I fancy—how one indulges idle fancies on board o' ship!—that he has had a recent trouble; may have lost the woman he loved—really, I must take to fiction—or, perhaps, lost a fortune. From a word or two he let slip, I gathered that he was poor and was going out to earn his living. The more I see of him the more I like Mannerling. I have—I hope in an inoffensive way—endeavored to make him and Miss Nina friends, but he is shy in his grave way and he is disinclined for the society of ladies—anyway, he avoids all of them, which makes me think that his trouble may be connected with one of the gentler sex. Notwithstanding all the efforts of the women on board to 'draw him out of his shell,' he resists their blandishments."

Nina frowned thoughtfully over this. Yes, she remembered, Mannerling had seemed to avoid her and the other ladies.

The journal was continued to the day of Fleming's death, and his anxiety on her account, his plan of a marriage with Mannerling, even the reasons for it, were set down.

"I had hard work to induce him to take the course I myself pressed on him," Nina read; "and even after he had agreed to the marriage, and I had gained Miss Nina's consent, he partly executed an idea of escape for her and me in order to avoid the ceremony. I respect his scruples. Alas they will have to yield to inexorable Fate! I am dying! I must make them man and wife before I go. It must be so, for her sake, for the sake of her future. Heaven will, I feel, give me strength to perform the ceremony, though it may not vouchsafe me sufficient to set it down here. I hope I am acting for the best for both of them. If not, as Mannerling said, may God forgive me!"

It was the last entry; he did not live to make another; and Nina's eyes, as she bent over the book, filled with tears. And her heart, too, was filled with bitterness. It tortured her pride to read, in black and white, Mannerling's objection to, dislike of, the marriage.

But she put the book at the bottom of the box in which she had

placed Fleming's things, and set to work vigorously. There were very few articles belonging to Mannerling. He who had thought of so many necessary things for the rest had, apparently, ignored his own comfort. There were a few spare clothes which quickly, timidly, and, of course, without examination, she folded and laid aside, with a strange sense of shyness. It seemed to her as if he might resent her interference; but

triumphed over discovery.

She listened earnestly as to some him; then she remembered a story she had heard of a man who had been killed by a stone.

"I also found more evil gold. Some of the quartz, ever they call it, show quit on the big stones or rocks in river beds."

"Yes. Do you like the dirt this way or stewed? I put empty tin amongst the ash fire. Is it all right—done e"

"It is very good," he said a delightful dinner and a ing it. Where was I?—Oh, And I think there is copper the place seems to abound able minerals."

She nodded carelessly and "We seem to find all the things," she said. "Now been two persons in a boat venture, cast on an uninhabited land, we should find all the things, or the materials out to make them."

"Ah," he said, rather resolutely. "I always had, even as a suspicion of fraud in those stories; but I little thought thing was so tragic and unable as it is."

"I am sorry you are not able," she said. Then she remembered the two she had lost tears came into her eyes.

them and tried to divert her. "We haven't tried the others; they always perform in the books—sending empty bottles. We are shipwrecked on an island. Help us! Rescue!"

"I've only three empty bottles. I couldn't spare them," she said. "One is a rolling pin and weighs in gold."

"Yes, but your people! Their anxiety will be, must be, very heavy," he said, gravely.

"I haven't any people," she said. "My father and I were alone in the world. I suppose we must be relatives, but I never heard of us. We lived for one another." She paused she said, with her eyes fixed on the table. "If you would like to communicate with your people, sacrifice my bottle."

He shrugged his shoulders. "Of no consequence."

She looked at him with startled surprise.

"Your sister, brother? Whom you have some one?"

"Why should I any more?" he answered. "I have a father or mother or a sister or a brother; and as to the rest of my family," grimly, "they won't suffer from my disappearance. Are you not going to tell me?"

He thanked her and sat down on the ground before the fire at the pipe. He was terribly tired, presently, as she glanced at him, she saw his head fall back—he had fallen into a deep sleep. His attitude was an uncomfortable one, and she longed to put something for him to lean against, but she desisted. She felt that it was only because of his sitting so "fidgety"—that she stole on tip toe to him.

As she stood over him her eyes wandered over his form. She noticed the shadow that clustered closely on the side of the strong neck, the great shoulders that lay flat, the handsomeness of the whole figure. The thought flashed across her mind that he was the best looking man she had ever seen. And how tired

The maternal instinct, which lies
dormant in all women, awoke in her
and her heart ached with pity for
him.

She drew the box gently against
his back. But the touch, gentle as
it was, awoke him; in a moment he
was on his feet and had seized her
arm in a grasp of iron, his vacant
eyes glaring at her sternly. She
thought he was going to strike her,
but suddenly he was awake fully and
staring at her with dismay.

"I—I beg your pardon!" he stam-
mered. "I must have fallen asleep;
and I dreamt that the Lascar had
come back. I must have thought
you were he and—oh, I beg your
pardon!"

"If you'd let my arm go," she said
with a painful smile. "You are hurting
it. I am glad I am not the Lascar!"
He released her arm, and in doing
so saw that the ring was not on her
finger. He did not frown or show
surprise; but his face became thought-
ful, and he avoided her eyes.

She noticed the subtle change in
his manner, though she did not dis-
cern the cause.

"I will go now," she said; it al-
most seemed a formula. "Give me
your coat, please."

"My coat?" he repeated, vaguely.

"Yes. You have torn it; I will
mend it for you."

"Oh, don't trouble," he said, rather
coldly. Why had she taken off the
ring? Was she afraid of him—afraid
that he would forget his promise?
His heart swelled with bitterness.

"Give it me, please," she said with
her queenly air of command. "You
have not too many coats, I know."

Obediently he took off his coat and
she flung it over her arm, wishing
him "Good night," and left him.
He refilled his pipe with her tobacco
—it was not half bad, but he sighed
as he thought of his favorite brand
—and sat over the fire smoking for
a time, then swiftly he rose, resolved
to conquer his reluctance to take re-
possession of the hut. As he passed
hers he saw that the light was still
burning.

He lit the pine torch at the door
and stood dead short at the thresh-
old, astounded by the change she
had wrought in the hut. Looking
round his eyes caught the flowers she
had put on the table, and he took
them up and smelt them, then put
them down and frowned at them

Vane." Here!

Who was she, this beautiful, per-
fectly beautiful woman?

With a sudden thrill of relief that
seemed to set the blood running in
her veins again she thought that it
might be his sister. Then, cold as
ice once more, she remembered that
he had said he had no sister.

Her hand closed spasmodically over
the portrait, and she rose in pas-
sionate indignation and resentment.

This portrait she had found in the
pocket of her husband's coat— Her
husband! Her husband! Ah, yes;
but her husband in name only. He
had married her under compulsion;
he had fought, argued against the
marriage. No wonder, with the por-
trait of this beautiful woman on his
breast! Oh, what should she do,
what should she do?

With a gesture of loathing and de-
spair she flung the miniature from
her and, sinking into the chair, bur-
ied her face—in his coat.

CHAPTER VII.

Nina lay awake all that night.
Wedded to a man who married her
against his will, and who carried the
portrait of another woman—and how
beautiful a woman—in his breast
pocket.

But Mannering slept soundly, rose a
little after the wondrous dawn and,
having got through his usual work,
went to the saloon. Nina was not
there and he saw that breakfast was
only laid for one. She came in as he
was pondering over this fact, came in
with a quick step and said, in a
matter-of-fact way:

"Good-morning. I have had my
breakfast"—she had not been able to
eat anything. "I had so many things
to do. Have you got everything you
want?"

"Yes, thanks," he said, absently.
Something in her tone, a coldness
and aloofness, struck him; and glanc-
ing at her he saw that she was paler
than usual and that her eyes were
dull.

"I hope you are not overworking
yourself," he said, earnestly. "There
is really no need for it. We have
plenty of time to do what is neces-
sary; and I could help you in ever
so many ways. For instance, for the
future you must let me bring the
water from the spring; the can is
heavy. And I will light the fire."

She laughed, but mirthlessly. "And

The w so intense—she told her- it was only because the im sitting so "fidgetted" she stole on tip-toe to

stood over him hesitatingly vandered over his face and e noticed the short curls red closely on the bend of neck, the great shoulders, flat, the handsome face, of the whole figure. The ashed across her that he est looking man she had And how tired he was!

had wrought in the hut. Looking round his eyes caught the flowers she had put on the table, and he took them up and smelt them, then put them down and frowned at them thoughtfully. Why had she taken the trouble to turn out the hut, to alter the arrangement so that he might not be haunted by the memory of his dead friend? Why had she put the flowers there for him? Something lit a fire in his eyes, then they grew dull. She had taken off his ring. It was just a woman's idea of pity that had impelled her to tidy up and arrange the hut. With a sigh he set down the bottle of flowers and began to undress.

Nina carried the coat to her hut, and finding her needle and thread, lit the ship's lamp. But she paused, with the coat in her lap, and turning up her sleeve looked at her arm. The marks of his fingers showed on the white flesh. She held her arm to the dim light and looked at it with a faint pensive smile. How strong he was! His grasp had been like that of a vice. She had felt that if she had moved her arm it would break. How strong he was, how handsome, and yet how gentle to and considerate of her! He was treating her with the chivalry of a knight-errant. Yes, he was good, good! If she had met him, say in London, under ordinary circumstan- ces, and they had grown to know each other in the usual way, midst all the surroundings of civilization, perhaps he might—she might—they might—

The color rose to her face. Whither were her foolish thoughts leading her? With a gesture of self-rebuke she took up the coat and mended the worst rent the bushes and under- growth had made in it. She could not do much for him, but at any rate he should not go about in a ragged coat.

As she turned it over something fell from the breast pocket. She groped about on the ground and presently came upon a small, flat leather case. She turned it over and over curiously, then put it on the table. Whatever it was it did not concern her. It might contain bank notes, letters—no; it was not bulky enough for that; it was just simply a flat case. It haunted, mocked, fascinated her. She tried to keep her eyes from it, to concentrate her attention on the coat, but the thing seemed to exercise a power over her; and at last, with a gasp of shame, she snatched it up.

It was fastened by an ordinary clasp, and, pressing it, it flew open slowly and revealed the portrait of a woman. It was a colored miniature, and of so lovely a face, of such al- most perfect beauty, that Nina's first emotion was one of unalloyed admi- ration. The eyes were blue, the complexion a delicate ivory—old ivory—the hair a rich auburn. The neck was bare, perfectly modelled and of snowy whiteness.

Admiration at first; but suddenly it gave place to—what? The blood rose to Nina's face, her eyes darkened and grew hard. Her bosom—as white, by the way, as that of the portrait—rose and fell with instinctive resentment, and her breath came thickly.

He carried a woman's portrait in his pocket—over his heart! Her own heart grew cold, then burnt hotly. She put the miniature close to the lamp and studied it. There was some writing at the bottom of it: "To my dear Vane. Judith."

The words struck her like so many strokes of a dagger. Her "dear

so many ways. For instance, for the future you must let me bring the water from the spring; the can is heavy. And I will light the fire."

She laughed, but mirthlessly. "And do the cooking, and lay the table, and wash up the things; and I could sit by with some fancy work and watch you. Oh, no, I am not working too hard; if it were not for the work I should—" "go mad," she was going to say; but she stopped short and made a gesture of impa- tience.

"I am going to set about that boat," he said; "but I shall be back to lunch."

"Oh, I've tied up your lunch for you," she said, coldly, pointing to the package.

"Very well," he responded, almost meekly. "Perhaps it will be better; it will save time."

"There is your coat," she said, taking it up and holding it out to him.

(To be continued.)

The trouble with most of us is that we can't in any way contrive to make our debts pay our expenses.

One way to get wisdom is to stop be- lying foolish.

If you keep your mouth shut you won't have to eat your own words.

Keep a good heart. It is a handy thing to have around the house.

Whooping Cough
1 CROUP ASTHMA COUGHS
BRONCHITIS CATARRH COLDS

Vapo-Cresolene

ESTABLISHED 1879

A simple, safe and effective treatment for bron- chial troubles, avoiding drugs. Vaporized Creso- lene stops the paroxysms of Whooping Cough and relieves croup at once. It is a boon to suf- ferers from Asthma. The air rendered strongly antiseptic, inspired with every breath, makes breathing easy; soothes the sore throat and stops the cough, assuring restful nights. It is inval- uable to mothers with young children.

Send us postal for descriptive booklet. 209

WOMEN TAKE NOTICE!

A man cannot understand the torture and suffering many women endure uncomplainingly. If the majority of men suffered as much pain and endured with patience the weakening sicknesses that most women do, they would ask for immediate sympathy and look for a quick cure.

Many women have been saved from a life of misery and suffering by turning to the right remedy—Dr. Pierce's Favorite Prescription—a remedy which is safe to take because containing no narcotics, alcohol or injurious ingredients. It is an alternative extract of roots, made with pure glycerin, and first given to the public by that famous specialist in the diseases of women—Dr. R. V. Pierce, of the Invalids' Hotel and Surgical Institute of Buffalo, N. Y.

MRS. HESSEIMER.

MRS. LIZZIE M. HESSEIMER, of Lincoln, Neb., 529 "C" St., says: "I send a testimonial with much pleasure so that some suffering woman may know the true worth of your remedies. I was a great sufferer from female troubles but after taking one bottle of Dr. Pierce's Favorite Prescription, which a friend advised me to take, I found myself very much improved. After taking three more bottles, and using two boxes of Dr. Pierce's Lotion Tablets, I found myself on the road to recovery. I was in poor health for five years but now I am cured."

"I hope all women suffering from female weakness will give Dr. Pierce's Favorite Prescription a fair trial."

Doctor Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

A Noted Climber.

Dr. Tom G. Longstaff is now, at the age of 37, one of Britain's most noted climbers and explorers.

One of his greatest exploits was four years ago, when he ascended Mount Trisul, in the Himalayas, 23,400 feet above sea level. Trisul means trident, and the mountain received that name because of its three top-most peaks, which are supposed by the natives to be the trident of the god Shiva.

Dr. Longstaff, who is an Etonian and Christ Church man, is the eldest son of Lieut.-Colonel Longstaff, who was twice chairman of the Hull Incorporated Chamber of Commerce and Shipping. He is as keen as his son on travel and exploration, as is evident from the fact that he promoted the Antarctic Expedition of 1899, and subscribed no less than \$150,000 to the funds.

Minute Writing.

In the reign of Elizabeth, a celebrated English calligrapher made a copy of the Bible which could be enclosed in a nutshell, and a Roman artist went one better by writing a Latin poem in gold and enclosing it in the rind of a grain of corn.

Again, in the library of St. John's College, Oxford, there is—or, at any rate, was—a portrait of the head of Charles I., made up of written characters giving the effect of engraved lines; while the British Museum possesses a similar portrait of Queen Anne composed of a lengthy treatise in a microscopic hand.

Hemlock, of Course.

"I dined with Sir Arthur Conan Doyle recently in London," said a magazine editor proudly.

"What is Doyle up to now?" a reporter asked.

"Sir Arthur is now busy with a society for reforming the English divorce laws—a society for making divorce easier. He is president of this society."

The magazine editor laughed gaily. "Sir Arthur is no foe to marriage," he said, "but he thinks that a bad, uncongenial marriage is a terrible thing. Discussing such marriages with me, he got off rather a good epigram."

"Socrates," he said, stroking his big mustache. "Socrates, you know, according to an Eton boy, died of a dose of wedlock."

PRESS COMMENTS.

Stratford Beacon.

The hand that rocks the cradle in the old land is now appearing in a new role now with a different kind of rock.

Calgary Herald.

It is interesting to note that according to the revised census figures both Ontario and Quebec made larger increases in population than either Alberta, Manitoba or British Columbia.

Vancouver Province.

With the discovery of the South Pole, scientists will be enabled to trace the wind to its place of origin. This will be important information to the politicians who use large quantities of the raw material in their business.

Windsor Record.

You really have to hand it to Arthur Hawkes. The Government pays him a fat salary as special Commissioner of Immigration, and he acts as his own press agent by printing his speeches in The British News which he still edits.

Woodstock Sentinel-Review.

The citizen who neglects his duty may be brought before the Magistrate and fined, but there does not seem to be any power—or is inclination the word?—in the police department to hold the municipality up to its obligations.

London Advertiser.

The new Finance Minister says no changes in the tariff will be made and the steel bounties will not be renewed. Mr. White is quite right, from a party standpoint, in declining to raise any more controversial questions just now. The Government has trouble enough.

Winnipeg Tribune.

Despite discouragements of the past season, owing to transportation handicaps, to say nothing of the big market closed to the south, 1912 will be a greatly increased acreage in the three great grain-growing Provinces. 1912

BITS OF FOOD HISTORY

THE EARLY BRITAINS LIVED CHIEFLY ON GRAIN.

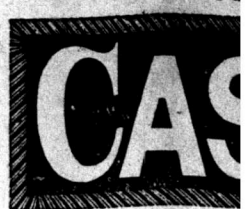

Our Far-Away Ancestors Were Mainly Vegetarians Except When a Great Religious Festival Became Necessary and They Lunched on a Man—The Coming of the Fork and the Potato.

The Christmas plum-pudding is traced to a Teutonic origin. In Germany it used to be plum-squash (Pflaumen-grutze), a soft, squashy mess resulting from the extraction of the juices from fresh plums; on the Danish borderland it is still so made. A black plum-squash is mixed with fine-grained rice or pearl barley or groats; these grains are regarded as representative of next year's favorable harvest. Thus it is explained by Frederick W. Hackwood in Good Cheer; so that we owe to the Teuton much that makes life pleasant, a fact to ponder well between political crises.

The early Britons, according to the testimony of Diodorus Siculus, were remarkably simple in their diet. The grain they cultivated in little patches was reduced to paste in a mortar and formed their chief article of food. Practically the only additions to the table were milk and flesh. On great and solemn occasions, however, as in times of public calamity, an unnatural feast was celebrated. The Druids enjoined the immolation of certain victims to excite or to appease one of their multifarious deities. A venerable Druid, perhaps trembling himself at the awful rites he was about to perform, led the silent flock into the secret recesses of the sacred groves of oak. There, at the dark hour of midnight, the human offering was brought forth and adorned for the altar. At the fatal sign the consecrated dagger was plunged into the victim's heart. The body was then laid open, the entrails examined, and the augury pronounced. Finally the bloody butchers sat down to their horrid feast, each one without exception religiously partaking of the human sacrifice. These awful orgies were celebrated with weird rites and the mysteries of an esoteric religion in the deep and gloomy recesses of the primeval forest.

Among the host of interesting things in Mr. Hackwood's fascinating collection is the description of the fork and its coming: As regards the use of forks in Italy, we find them mentioned by Peter Damiani, an Italian writer of the eleventh century. To warn a lady to whom he is writing of the great danger of setting her heart on luxurious living, he proceeds to tell her a story which he had heard from a person of veracity: "The Doge of Venice had married a lady from Constantinople, whose luxury surpassed all imagination. She would not even wash in common water, but had the cruelty to compel her servants to collect rain-water for her! . . . But what is most monstrous, this wicked creature would not eat with her fingers, but absolutely had her food cut into pieces, rather small (minutius), by her attendants and then she actually conveyed them to her mouth with certain golden two-pronged forks!" With the judgment which of course befell this profligate slave of luxury we are not concerned; but we at least discover the important fact that the luxury of forks was a novelty in Italy in Damiani's days, i.e., about the time of William the Conqueror. And at the time of the Franco-Prussian war there

WHY OWN WEBSTER'S NEW INTERNATIONAL DICTIONARY

THE MERRIAM WEBSTER?

Because it is a NEW CREATION, covering every field of the world's thought, action and culture. The only new unabridged dictionary in many years.

Because it defines over 400,000 Words; more than ever before appeared between two covers. 2700 Pages. 6000 Illustrations.

Because it is the only dictionary with the new divided page. A "Stroke of Genius."

Because it is an encyclopedia in a single volume.

Because it is accepted by the Courts, Schools and Press as the one supreme authority.

Because he who knows Wins Success. Let us tell you about this new work.

WRITE for specimen of new divided page. G. & C. MERRIAM CO., Publishers, Springfield, Mass. Mention this paper, receive FREE a set of pocket maps.

season, owing to transportation handicaps, to say nothing of the big market closed to the south. 1912 will be a greatly increased acreage in the three great grain-growing Provinces. 1912 looks at the present time like a record-breaker.

Victoria Sun.

A debt of seventeen millions was fastened on the shoulder of the people of this Province, fewer in number than the city of Toronto. When will the public wake to the seriousness of the situation and appreciate their responsibilities? Is everyone to remain deafened by the golden ear lugs, and for how long?

Hamilton Times.

Some of our esteemed contemporaries have found the highest court in the realm deciding against their contentions. Immediately they raise an outcry for the abolition of the highest court in the Empire. "What right has it to enforce law and justice when we wanted something else? Let it be understood that we are always right."

Edmonton Bulletin.

That small fraction of society commonly known as the "smart set" has been receiving attention from the ministers in some of the city churches. Arrows aimed in that direction do not usually get to the mark, for the reason that the "set" are "smart" enough to stay away from the places where they would hear themselves adversely criticised.

Saskatoon Phoenix.

Alarmed at the large emigration of farmers to Canada, the United States Government is going to take active measures, in co-operation with the various States, to make home conditions so attractive that the farmers will not want to leave. If the reciprocity measure had gone through it would have taken nothing short of a good substantial bounty on farm produce to keep them from crossing the border.

Brantford Expositor.

It is said an effort will be made to secure a simultaneous demand in the United States and in the British possessions for an eight hour day. The time will almost certainly come when an eight hour day will prevail, at least in all English-speaking countries but it is not easy to see why a nine-hour day should not first be secured. It is not reasonable to expect capital to jump from a ten hour to an eight-hour day, and maintain the same rate of pay.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

each was prolonged slave of luxury we are not concerned; but we at least discover the important fact that the luxury of forks was a novelty in Italy in Damiani's days, i.e., about the time of William the Conqueror. And at the time of the Franco-Prussian war there were workhouses in this country wherein the inmates ate with their hands for lack of knives and forks.

Of course, we know the haggis, though perhaps no Southern is aware of its exact contents, but accepts it as a mystery. And a greater mystery still is the cooking of the East: A dish eaten all over Northern Africa, from the Red Sea to the Atlantic, is Kuskouso and it is prepared to-day as it was in the primitive centuries of long ago. It consists of wheaten flour, dusted on to drops of water, and mixed lightly and quickly by the hands of a woman, the mass of moistened particles growing gradually larger, the art of the operator being to cause it to granulate and to prevent it from clotting. Each grain is only the size of a pinhead, and when enough has been formed it is put into a conical basket of palmetto leaves, which is placed over an earthen pot containing boiling water and cooked by the steam. The poor eat it alone, the wealthier class with meat. In the book of Judges we read that Gideon used a pot and basket in his simple cookery.

No one who knows Sir Charles Stanford's collection of Irish folk-songs can forget the one about the potato famine. In all music I know of none so haunting in its hungry lonesomeness. This leads us back to Mr. Hackwood: About the time of the great Irish potato famine, an eminent Dutch chemist, Professor Mulder, wrote a treatise on "Food, in its Relations to National Spirit," in which he has nothing but condemnation for "that ill-starred root" the "tragic potato." He maintains that of various aliments animal flesh, pulse, and cereal grains are amongst the most satisfactory, while rice, arrowroot, and above all potatoes, "cannot become a staple diet without the eaters not only dwindling in physical condition but growing more dull and torpid in intellect also than befits an enlightened race."

Christopher North dubs toasted cheese "the Welshman's delight, or Davies' darling," and speaks of the thread of unbeaten gold, shining like gossamer-filaments, that may be pulled from its tough and "tenacious" substance—a pretty piece of sentiment surely—"a divine sentiment extracted by the alchemy of genius from a Welsh rabbit," he calls it himself. It is a dish the Scottish philosopher and his cronies frequently indulged in; on one occasion their conversation reminds them of its toothsome-ness. "Talking o' cats reminds me o' toasted cheese!" and forth with the order is given for a Welsh rabbit as the national delicacy of the "wild Welsh."

The use of tobacco is universal in the orient. The word cheroot comes from Madras.

We have the Hon. Dr. Pyne's statement that English shall be the language of the schools of Ontario. We have also the promise of Sir James Whitney to the same effect. Now that Mr. Merchant's report has been received there should not be much delay in getting to work to remedy conditions in the bi-lingual schools.

Fountain Syringes and Hot Water Bottles.

At Wallace's Red Cross Drug Store you can get a two dollar quality of red rubber hot water bottle for \$1.50, every one guaranteed. A full line of sick room supplies.

we are all in a state of such to try it at our risk.

Rexall Orderlies are eaten candy, are particularly agreeable in action, may be any time, day or night; do diarrhoea, nausea, griping, looseness, or other undestrab. They have a very mild but action upon the organs when they come in contact, appearing as a regulative tonic upon relaxed muscular coat of the bowels, overcoming weakness, and restore the bowels to more and healthy activity.

Rexall Orderlies commonly relieve constipation, except when of a surgical character also tend to overcome the nervousness of the bowels in normal condition sizes of packages, 10 cents, and 50 cents. Remember, you can obtain Rexall Remedies in Nap at our store—The Rexall Store Wallace, Druggist.

Wild Goats In Scotland

An Edinburgh correspondent that wild goats are not so Scotland as is supposed. In two districts in the southern of Dumfries and Selkirk where seen herds of wild goats ever for the last forty years. The locality is the Loch Skene Hill head of Moffat Water. They have roamed from White Cairn Hart Fell and through the valleys, undisturbed by the shooting tenant, for many years. The other locality where they are seen is the high hills between Broad Law in Peebles the valley of the Meggat in shire.

Real "Sherlock Holmes"

The late Dr. Joseph B. F.R.C.S., Edinburgh, former lecturer of Anatomy at Edinburgh University, and the prototype of our Conan Doyle's character Sherlock Holmes, who died in last, at the age of seventy-four, in addition to considerable estate, personal estate in the Kingdom valued at over \$30

Cathartics and Pills and Cause Distressing Complaints.

Do not be over-careful in the use of medicine for children. The gentlest bowel medicine can be given, except in emergencies. Ordinary pills, cathartics and purgatives are apt to do more harm than good. They may cause nausea and other distressing conditions that are frequently healthful.

Physicians usually recommend and guarantee Orderlies as the safest and most dependable remedy, which is for constipation and associated disorders. We have such absolute faith in the virtues of this remedy that we put it on our guarantee of satisfaction in every instance where it is used. Entire satisfaction, and in fact, such medicine is our risk. Orderlies are eaten just like a particularly prompt and in action, may be taken at day or night: do not cause

"IT WAS MANY HEADS."

Strange Mistakes Made by Authors and Printers.

The errors in the public press in these days of rush and worry are, comparatively speaking, very unimportant and far between, and arise from a variety of causes, but they often afford wonder and amusement when read by the critical observer.

Sometimes the mistake in print lies with the author, but often it is owing to laxity on the part of the printers' assistants, especially in the matter of modern machine composition.

In machine type-setting there are four mistakes in particular which the printer is liable to make. The majority of machines at present in use are those which cast each line of type in one solid piece, so that if a correction has subsequently to be made in a certain line, the whole of that line must be removed and set up again, even though only a comma may be missing.

If, in his hurry, the man doing the correction is not careful, the corrected line is liable to be dropped in its wrong place, and the result of the transposed line when printed looks very silly. Then, again, he may carelessly

MONEY IN SHIPS.

Shareholders In Lines Have Received 75 Per Cent.

Imagine, a small investor getting back the whole of his capital in dividends in the course of two or three years or less! The thing is difficult, and yet when freights are high, as at present, such is the happy experience of shareholders in some one-ship companies, the best of which are far more successful than many of the lines whose flags fly in all parts of the world.

A sailing ship, the Marion Inglis, of Liverpool, Eng., paid a dividend of 30 per cent. in addition to earning a certain amount which was carried to reserve, after a singularly successful voyage of nearly twelve months.

Still more successful was the Willowdene. On her fifth voyage, which lasted 84 days, she earned \$8,750, bringing her returns to her shareholders in 181-2 months up to a sum equivalent to 37 1-2 per cent. per annum.

The Lady Lewis, of Cardiff, started her career in 1897 in little less glorious fashion. On her first and second voyages, which lasted 144 days from the time she left the builder's yard, she made a net profit of \$14,690, out of which was paid a dividend at the rate of 25 1-2 per cent. per annum.

Such amazing results as these bring about some curious "deals," and attempted "deals," in shares. A man who held a number of shares in a certain steamer once received a letter from somebody in a neighboring port, asking him whether he would sell his shares at \$100. As the local quotation was \$50 a share, he replied that he was not willing to accept such a price.

The correspondent returned to the charge by stating that he thought he could find a buyer at \$125 to \$137.50, \$125 for a \$50 share! What was in the wind, then. Smelling a rat, the owner declined to sell even at \$137.50, and soon afterwards he had reason to plume himself on his decision.

But even the Willowdene has often been beaten as a "money-maker." A Liverpool company could have paid 75 per cent. dividend on the first voyage of its only vessel, a steamer, and it actually did pay 50 per cent. More remarkable still the freight market is now so good that of late some vessels have earned on their maiden voyages, occupying but a short time, more than the entire cost of their construction!

Another side of shipowning must not be overlooked. Sometimes a vessel after filling her shareholders' pockets with profits accruing from freight, proves a further "money-maker" by carrying off a big prize in the lottery of salvage. And great are its possibilities. One of the things that some owners dream about is the luck of the Euplectela, a tank-boat, which within twelve months saved two steamers worth together no less than \$1,370,000.

It happens now and again, too, that a ship which has earned fat dividends can be sold for more than she cost.

FAMOUS DOCTOR'S PRESCRIPTION.

Generally, of course, any kind of craft depreciates in value year after year, but there are numerous exceptions to this rule.

Many cases in point happened in 1897, when, owing to the rise in freight rates, as well as the delay in delivery consequent on the great strike in the engineering trade, shipping property rose in value all round. A steamer, built in 1896 for \$138,500, changed hands after the strike for \$150,000; and one which was bought for \$140,000 was sold five weeks later for \$147,500.

Yet they do say, sometimes, that there is no money in shipowning!

Spy Epidemics: The Secret Blotter.

Every Foreign Office of Europe acts on the theory that an army of spies is constantly on the alert to steal its secrets, and infinite precautions are taken to baffle their efforts. Very shortly after the first use of blotting paper it was discovered that it was quite possible to cause a blotting pad to give up jealously guarded secrets by simply holding it in front of a mirror. Long after all the commercial world had forgotten the existence of such a thing, the British Foreign Office used a small shaker to dry its important written documents. Then specially manufactured black blotting paper was used, but this was not found to be absolutely spy proof, and a return to the sand shaker was contemplated, when someone suggested the simple expedient of a small absorbent roller. These rollers, we are told by an authority, have since been used for drying diplomatic documents. When such a roller has been run up and down across a document once or twice, the cleverest spy in the world is at liberty to try his hand at deciphering the impressions.

If, in your hurry, the man doing the correction is not careful, the corrected line is liable to be dropped in its wrong place, and the result of the transposed line when printed looks very silly. Then, again, he may care- lessly forget to put it back, and the consequent blank space is equally puzzling.

There is a third chance that he may put it in upside down, and you see the tops of the letters where the bot- toms should be, or else a black smudge, caused by the feet of the type "slug" being uppermost.

Then in another case—and this is the most frequent of this class of mistake—in re-setting the line the operator, in a lapse of mind or mem- ory, puts a word into the line, per- haps having a somewhat similar sound to the correct word, and makes some ridiculous statement.

Figures are another cause of blun- ders in machine type-setting. Mr. Andrew Lang gave some interesting instances recently of numbers going wrong, stating in his piquant way that he thought that printers were not often particular about dates. Ara- bic numerals yield infinite chances of trouble, and a century is jumped by the change of a single cipher. In one such instance, a gentleman very active in conspiracies and the like in 1580 is found to lose his head on the block in 1681. He was thus given a long life, and perhaps a merry one, by the compositor.

The examples of transposed or mis- spelt words are perhaps the most pro- lific cause of amusement.

In an account given a little while ago of a conversation the King had with an aged soldier, his Majesty asked the old warrior why he was not wearing his medals. "I have only one," was the reply. "Why," the King was made to answer, "I was told you were the only man who was present in the Crimes, at Magdala, and Coomas- sie!" Of course, this extraordinary statement put into the mouth of his Majesty quite changes its meaning when the word "present" is transposed and placed before "who was" instead of after.

Quite a sporting flavor was given to a statement printed in a recent great standard work by the omission of a small word in one line. The passage read: "It was many heads that Queen Elizabeth would marry Lord Robert Cecil." Naturally one would suppose that the phrase, "it was many heads" meant "it was long odds"! But the real wording ran, "It was in many heads" — that is, in many people's minds and thoughts, and was not meant for a sporting expression.

Knew About It.

"Some things don't bear an intimate equi- valence."

"What, for instance?"

"The simple life for one."

The Long Winded.

"There are two sides to every story." "Perhaps, but I know some men's stories have only one end—the begin- ning."

Just the Ordinary Man.

"How did he happen to fall in love with her?"

"They kept a good cook."

Stung.

"He hasn't any sense."

"Do you find him companionable?"

STEAM PUMP FISHING.

It Was Rapid, but Disastrous, and France Stopped It.

One of the most singular fishing devices imaginable was discovered by accident in France. Though extremely simple, the system is revolutionary.

A pond on the farm of La Marie-quette, bordered by rocky shores, was drained one year by the aid of a steam pump. Each stroke of the piston drew up twenty-five gallons of water, and the pond was emptied in a few hours, and not only was the water drawn off, but all the fishes also were transferred to a new element.

This was a revolution. The owners of ponds in the neighborhood followed suit, and the proprietor of the pump made a specialty of this sort of work. He "let" one of his pumps, modified for the purpose. The peasants of the region called it "the fish pump." Each stroke of the piston brought up torrents of water, in which were fish and crawfish, together with mud and debris.

One pond of several acres was cleared of fish at an expense of 36 francs, or \$7.20. The process was ingenious, but as one cannot have his fish and eat it, too, and as such rapid consumption would have led to equally rapid extermination, the authorities stopped the practice.—Scientific American.

HACKNEY COACHES.

Tradesmen Protested When They First Appeared in London.

In a letter dated April 1, 1639, Mr. Garrard, writing to the Earl of Strafford, says: "Here is one Captain Bailly. He hath been a sea captain, but now lives in London, where he tries experiments. He hath erected according to his ability some four hackney coaches, put his men in a livery and appointed them to stand at the Maypole in the Strand, giving them instructions at what rate to carry men into several parts of the town, where all day they may be had.

"Other hackney men seeing this way, they flocked to the same place and performed their journeys at the same rate, so that sometimes there are twenty of them together, which disperse up and down."

Citizen shopkeepers bitterly complained of this, saying:

"Formerly when ladies and gentlemen walked in the streets there was a

WOES OF POOR MALTA

BRITISH POSSESSION HAS LOST MOST OF HER TRADE.

Movement Is on Foot In England to Do Something That Will Relieve the Situation—Wages Are Very Low And the Natives of the Island Have Lost All Their Enterprise—Rich Have Lots of Money.

Malta deserves more than the passing notice it received from the King and Queen landing there for a few hours on their return journey from India. It is at the parting of the ways, and its people are growing desperate. Within living memory Malta was the warehouse of the Mediterranean, and a great coaling station. It was a regular port of call for the peninsular and Oriental and other great lines, and before Egypt caught the fickle fancy of the winter tourist it was a fashionable refuge from the cold and damp of England. But is immense storehouses are now empty. Algiers and other Mediterranean ports have all but captured its coal trade, only a few intermediate Peninsular and Oriental boats put in at irregular intervals, and its winter season has practically vanished. The unification of Italy and consequent fiscal barriers dealt it a severe blow years ago, and it now looks as though the Italian occupation of Tripoli will administer the coup de grace to Maltese trade.

In addition to all these troubles, there has been a marked decline in our navy and army establishments. Our battleship strength of thirteen in 1904 is now six only, and there are two infantry battalions the less on the island. The great military works have been completed, and with the necessities of the political situation requiring naval concentration in the North Sea rather than in the Mediterranean, the outlook is black indeed. The British Government has been suitably impressed with the precarious economic position of the colony and the difficulty of popularizing local government, and the usual palliative is being supplied — a royal commission of inquiry.

With Irish home rule, Welsh disestablishment, industrial troubles, and revolutionary legislative measures awaiting the consideration of the House of Commons, what prospect is there that Malta will get the attention its situation urgently demands. Its commercial development has always been handicapped by the military necessities of the empire, and we have a responsibility we cannot evade. Probably the British troops in Malta spend \$1,500,000 annually, and the fleet is worth \$5,000 a day as a channel of money. But this dependence on armaments has been in itself a cause of decay. It has weakened the morale of the people, and accustomed them to look for prosperity outside themselves.

It is not to be denied that the Maltese are unenterprising. They have failed to follow the progress of other countries. They have lost their coaling supremacy in the Mediterranean largely because they have no machinery or mechanical appliances for coaling ships expeditiously. To this day, despite a tideless sea and unrivalled harborage, ships must anchor off the shore and transfer goods by means of lighters and the methods of the Middle Ages. Is it surprising that the big steamship lines have deserted

King St. and Atlantic Ave., Toronto

He Liked Scotchmen.

The late Meredith Townsend had an affection for Scotsmen as contributors to the Spectator, of which he was for so many years proprietor and coeditor. Mr. Townsend's liking for the Scots was based on an experience he had in Leith when a boy. He was on a holiday and had run short of money for his return to London. He boldly boarded a London passenger boat, intimated his desire to the captain to go south, explained who he was and stated that he was without funds. Seemingly favorably impressed by the lad's tale and appearance, the captain, a Scot, said that would be all right and showed him to a cabin. "But," said young Townsend, "this is a saloon. As things are steerage would do all right." "Na, na, my mannie," said the captain. "If I trust ye at all I'll trust ye first class!" London Spectator.

The First Henchman.

Skeat derives the word henchman from hengstman (Anglo-Saxon), horseman, groom. It is probable that henchmen were in the first instance young nobles who at state ceremonies attended on the king as mounted pages. History speaks of these henchmen in this capacity, for we read that Henry VI. had three and Edward IV. six of them. We find, too, that they were mentioned in the royal ceremonies as belonging "to the riding household" and took part in tournaments. The last time "henchman" is mentioned in connection with the court is in the reign of Henry VIII., and gradually it came to mean an ordinary page. The word is used by Ben Jonson and Shakespeare in this sense.

A Wonderful Vine.

Grapelines are known to live a great many years and bear almost yearly crops of good fruit. One of the oldest grapelines in this country, which grows on Roanoke Island, North Carolina, is claimed to be more than 300 years old. Its yield is still very abundant, and the vine appears to be in good health. Historians declare that it was planted by members of Sir Walter Raleigh's party, who sailed from England for the coast of the new world in the year 1584. Many persons have secured cuttings from this plant, but few will grow.—Harper's Weekly.

A Fine Village Custom.

In past years it used to be customary here for the young people to indulge in choral singing on Christmas eve, but for a few years has been unobserved. This year it was revived, when about twenty-five of the best voices in town went out and treated the citizens to a magnificent serenade. The singers were accompanied by a cornet and alto. It is a charming way of ushering in the anniversary of the birth of the Holy Child, and we hope the practice will never again fall into desuetude.—Flesherton Advance.

them together, she dispense with and down."

Citizen shopkeepers bitterly complained of this, saying:

"Formerly when ladies and gentlemen walked in the streets there was a chance of customers, but now they whisk past in the coaches before our apprentices have time to cry out, 'What d'ye lack?'"

The word cab, a contraction of cabriolet, was not used until 1823.—London Standard.

HIS MEMORY CLEAR.

The Witness Proved to the Lawyer That He Could Remember.

A story is told of an eminent lawyer receiving a severe reprimand from a witness whom he was trying to browbeat. It was an important issue, and in order to save his cause from defeat it was necessary that the lawyer should impeach the witness. He endeavored to do it on the ground of age in the following manner:

"How old are you?" asked the lawyer.

"Seventy-two years," replied the witness.

"Your memory, of course, is not so brilliant and vivid as it was twenty years ago, is it?" asked the lawyer.

"I do not know but it is," answered the witness.

"State some circumstance which occurred, say, twelve years ago," said the lawyer, "and we shall be able to see how well you can remember."

"I appeal to your honor," said the witness, "if I am to be interrogated in this manner. It is insolent!"

"You had better answer the question," replied the judge.

"Yes, sir; state it," said the lawyer.

"Well, sir, if you compel me to do it I will. About twelve years ago you studied in Judge —'s office, did you not?"

"Yes," answered the lawyer.

"Well, sir, I remember your father coming into my office and saying to me, 'Mr. D., my son is to be examined tomorrow, and I wish you would lend me \$15 to buy him a suit of clothes.' I remember also, sir, that from that day to this he has never paid me that sum. That, sir, I remember as though it were yesterday."

Loved by Monarchs.

It is quite a mistake to suppose that kings and queens have neither the time nor the inclination to make pets of birds and animals.

Queen Mary, to take but one instance, loves to sit with a tabby cat purring on her lap. King George of Greece is seldom seen in public without a mongrel cur at his heels. The Kaiser shows great partiality for a pug, and the Queen of Belgium is passionately fond of horses.

The late Queen Victoria was devoted to dogs, and almost wherever she went a collie, named Roy, Spot, a fox-terrier, and a Pomeranian, called Marco, accompanied her. For fifteen years another member of our own royal household had for her chief pet a white cockatoo with a salmon-colored crest, which objected to wearing feathers during summer, and plucked out every one except those on its head, neck and tail.

Children Cry FOR FLETCHER'S CASTORIA

day, despite a tideless sea and unrivalled harborage, ships must anchor off the shore and transfer goods by means of lighters and the methods of the Middle Ages. Is it surprising that the big steamship lines have deserted Malta? There are no commercial docks or adequate landing stages, and Malta has conspicuously failed to utilize its magnificent natural advantages.

Not so very long ago the manufactures of sail cloth, pottery, soapmaking, and kindred industries were flourishing, and gave employment to large numbers. To-day they have practically perished, the little that is left remaining in the hands of people with neither scientific knowledge nor capital. The oil trade has gone, and it is only a memory that once upon a time Malta was the storing-place of all the oil produced on the Barbary coast. An Austrian boat takes the British mails and German and Italian vessels have most of the carrying trade. Go down to the Grand Harbor on any day and it will be a matter of surprise if a British boat is seen.

The position of Malta is indeed desperate. Its people are growing more numerous, and progressively poorer. Wages are very low. Coal-heavers once earned \$2.50 a day; now \$1 is the average daily wage. Agricultural laborers are glad to get 35 cents, and a skilled mechanic must accept 50 cents. Even the famous Maltese lace industry has declined, and a woman works for fourteen hours over her bobbins for little more than as many pence. A doctor is passing rich on \$300 a year, and the lawyers are an absurdly poor class, in spite of Maltese laws and the Maltese love of litigation.

It is difficult to fairly apportion the blame for this decay, and in Malta there is much foolish recrimination. That the Imperial Government has a duty to perform is obvious. There is no land or income tax in Malta, and the wealthy classes practically escape taxation. The Imperial Government should compel the Civil Government to find new sources of revenue, and to finance works of urgent public necessity, such as the provision of proper commercial docks, landing-stages, etc. But legislation alone will not save Malta. There must be a better public spirit. The truth is that the Maltese have neither spiritual nor temporal leaders. The Church in Malta does little, if anything to better the condition of the people, and the well-to-do classes are wickedly indifferent. In spite of the poverty of the people, there is a great deal of money in the island, but it is lying idle or is invested abroad. There is no attempt to revise or establish industries. English money and English management had to be found before Malta had even an electric tramway. The wealthier Maltese are intensely suspicious of each other, and will not unite and employ their capital in local enterprises.

Chinese Fruit Men.

Nearly all the fruit shops in New Zealand are kept by Chinese.

His Only Worry.

Graphter—"I've got my hooks out for a swell political office, big salary and all that. Jenkins—Do you think you can fill it? Graphter—Never thought of that. What's worrying me is whether I'll be able to get it.—Philadelphia Ledger.

Something New.

"Your snowstorm made a hit." "I knew it would," declared the proud playwright.

"Yes; they turned it loose in the drawing room scene."—Exchange.

eggs on the islands of the Pacific. During 1911 three schooners 38,000 dozen eggs from Molokai and three other schooners from Pedro. The eggs in boxes of 500 and 1,000, sold at \$3 to \$3.25 for a box.

When a boat arrives in Janbooby eggs it is the occasion of little excitement among the men who buy them by the then sell them retail chiefly in stone, though they are also in Spanish Town, Port Antonio Bay and in other towns.

Booby eggs are peddled, he on the streets of Kingston, pepper being provided in the purchasers may eat them once.

These eggs are about twice the size of an ordinary hen's egg quite palatable.

Natural Error.

"Will you take me to you Mr. Merry?"

BABY TERRIBLY SCALD

Relieved by Zam-Buk

Doctor Agreed Zam-Buk "Best Possible Treatment"

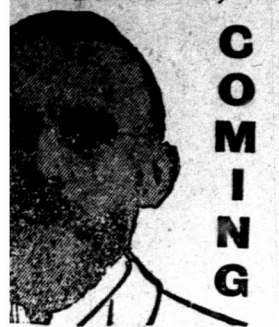

Mrs. Albert Sawyer, of (Ont.) says: "While living last winter my little son fell into a vessel of boiling water over his head. He was terribly scalded, and immediately called in a doctor. Treatment did not seem to do much for him, and he was in a very bad way. I then used Zam-Buk and applied it. In a few days he was almost well, and after a few days' use the scald was getting along finely."

"To make quite sure the doctor, however, we called in. He said everything along splendidly, the scalding and the little one would quite recovered. Then we used Zam-Buk and applied it. In a few days he was almost well, and after a few days' use the scald was getting along finely."

Mrs. S. Smith and Mrs. J. of 73 Brock St., Brantford, of the above accident, and I, I certify that the facts are true in every detail. Mothers should know that cuts, scalds, bruises, eczema, all skin diseases, there is no equal Zam-Buk. That was the opinion of the doctor connected with case, and is the opinion of other doctors the world over. Zam-Buk is obtainable from all stores 50c box, or Zam-Buk Toronto.

THE BABY'S DIET.

A Question of Much Interest to Many
Young Mothers.

For the young mother who does not
nurse her infant the most vital ques-
tion is, What food will be best for
baby?

The selection of food depends large-
ly upon the infant's physical con-
dition. What will agree perfectly with
a normal child will act as poison to
the baby with weak digestive organs.

Always consult your physician re-
garding the proper food for baby and
do not allow yourself to be guided by
the advice of neighbors and sympa-
thetic friends.

Baby's life is too precious to chance
a change of diet unless ordered by one
who is thoroughly familiar with the
physical condition. Pasteurized milk
modified with limewater or barley wa-
ter is considered the safest food for
an infant.

Use only the very best quality of
milk that can be bought, that which
has already been pasteurized if possi-
ble.

If you are unable to obtain this pre-
pare enough milk for a day's feeding
in clean bottles. Mix it first with
one-third barley water, fill the bottles
and stand them in a large vessel with
enough hot water to cover the bottles
halfway. Let the water come gradu-
ally to the boiling point and boil for
ten minutes. Cool rapidly and keep
on ice until needed. Barley water is
prepared by boiling slowly two tea-
spoonfuls of pearl barley in one quart
of water for one hour. Strain and mix
with milk. Limewater can be bought
at the druggist's. If you make it
yourself dissolve a lump of unsalted
lime as big as a walnut in two quarts
of water. Let it settle and use only
the water poured carefully from the
top.

Rice water is sometimes recommend-
ed. For this soak two and a half tea-
spoonfuls of rice for three hours in a
quart of water, then boil it slowly for
an hour, adding a little sugar and a
pinch of salt.

The quantity and number of feed-
ings per day depend upon the age and
general condition of the baby.

Feeding after one year of age, unless
otherwise ordered by a physician,
should consist principally of pure, fresh
milk.

A little solid food, including soft
boiled eggs, mutton, chicken or beef
broth, stale bread or buttered toast,
well cooked cornstarch, oatmeal or fa-
rina, can supplement and vary the
milk diet. Do not give baby any raw
food, fruit, coffee, tea, beer or liquor
of any kind whatever.

Train the child to eat at regular in-
tervals, then see that its meals are
properly prepared and on time.

To Cook Rice.

Rice boiled tender in milk, seasoned
with sugar and lemon juice and when
cold cut into pieces, rolled in egg and
cracker crumbs and fried makes a
tasty dessert for luncheon.

For Spanish rice brown half a cup-
ful of rice in hot fat, add an onion,
chopped fine, a tomato and a mashed
clove of garlic. Cover with hot wa-
ter, season with salt and pepper and
cook the rice till tender, adding water

A PROBLEM IN FIGURES.

It Scared the Mathematician, but the
Women Solved It.

One day a teacher of mathematics
went shopping with his wife. He tag-
ged along listlessly from counter to
counter until they came to the dress
trimmings department, and there he
found something in his line. Said his
wife to the saleswoman:

"How wide is that gold spangled
black crape?"

"Three-eighths of a yard," said the
girl.

"How much is it a yard?"

"Three dollars."

"Well," said the professor's wife,

"how much of three-eighths wide ma-
terial will it take to put four six-inch
strips around a two and three-quarter
yard skirt that is seven inches nar-
rower at the knees than it is at the
bottom, and how much will it cost?"

At the first mention of those figures
the professor's head began to reel, and
it reeled still more when his wife and
the girl got out pencils and paper and
began to do their sum. Presently his
wife said:

"Here, dear, you know all about
mathematics. Help us solve this prob-
lem, won't you?"

But the professor said: "Excuse me;
I feel faint; I must get a little fresh
air," and ignominiously fled.

His wife came home with exactly
the amount of material required, and
the professor took her word for it that
she didn't pay a cent too much.—Phila-
delphia Ledger.

FENCES THAT BLOOM.

They Grow Twenty Feet High and Are
Armed With Great Thorns.

Throughout the older parts of Mex-
ico, Texas and New Mexico many of
the fences around the corrals and of-
ten the gardens are made of "ocotilla."
This is a cactus-like plant growing in
a stalk form and often reaching a
height of twenty or twenty-five feet.
It is completely covered with long,
stout thorns.

The stalk is tough, hard to cut, at
most impossible to break, and, growing
to the height it does, it makes an
effective protection. It is planted usu-
ally in three or four alternate rows
and is held together by buckskin
strings or with strong wire. It needs
but little water.

I believe this ocotilla fence would be
found very satisfactory to use on
country estates, and even the owner
of a modest plot of ground would find
it a good thing. It prevents stock
from breaking in, effectively keeps at
a distance all marauders and when in
bloom is a beautiful sight, for at the
tip of the stalk there comes early in
summer a cluster of deep crimson, ball
shaped blossoms. I remember once
the astonished, almost horrified, ex-
pression of an eastern woman to whom
I mentioned the beauty of the corral
fence when in bloom.—Country Life in
America.

Toronto, March 14.—Mr. A. M.
Rankin, M.P.P. for Frontenac, will
have his bill "to regulate the width
of tires on waggons and other vehi-
cles," before the House for a second
reading within a few days. The mea-
sure, which has a radical bearing on
every farmer in the province, speci-
fies not only that tires shall conform
to a minimum width in excess of
anything previously enforced, but
that on and after January, 1914, a
vehicle shall not be sold or offered for
sale in Ontario, the tires of which do
not conform to the act.

The bill contains the following
cause:

The minimum width of tires for a
four wheeled vehicle shall be:

(a) For one having a carrying ca-
pacity of 2,000 pounds and not ex-
ceeding 4,000 pounds—3 inches.

(b) For one having a carrying ca-
pacity exceeding 4,000 pounds but not
exceeding 6,000 pounds—4 inches.

(c) For one having a carrying ca-
pacity exceeding 6,000 pounds and
not exceeding 8,000 pounds—5 inches.

(d) For one having a carrying ca-
pacity exceeding 8,000 pounds—6
inches.

The minimum width of tires for a
two-wheeled vehicle shall be five inches
for one having a carrying capacity
of 2,000 pounds, but not exceeding
4,000 pounds, and 6 inches for one
having a carrying capacity exceeding
4,000 pounds.

The tires of wheels having a diam-
eter of 40 inches or less shall be one
half inch wider than the widths pre-
scribed by sub-sections 1 and 2

Every person who contravenes any
of the provisions of this Act shall
incur a penalty of not less than \$5
and not more than \$50, recoverable
under The Ontario Summary Con-
victions Act.

ful eggs in hot fat, add an onion,
 chopped fine, a tomato and a mashed
 clove of garlic. Cover with hot wa-
 ter, season with salt and pepper and
 cook the rice till tender, adding water
 as it is needed, but not stirring.

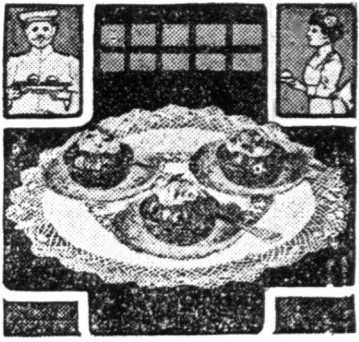

For rice tortillas mix a cupful of
 flour, a cupful of ground rice, half a
 cupful of milk, a tablespoonful of bu-
 ter and a little salt. Knead the mix-
 ture thoroughly, break off pieces and
 pat into cakes until each cake is large
 and very thin. Bake on a griddle until
 brown.

A rice omelet makes the ordinary
 omelet more substantial. Add to the
 well beaten yolks of three eggs a third
 of a cupful of milk and half a cupful
 of boiled rice with two tablespoonfuls
 of butter, salt and pepper. Fold in the
 stiffly beaten whites of the eggs at the
 last. Cook the omelet slowly.

Delicious stuffed eggs have the hard
 boiled and mashed yolks mixed with
 an equal part of hot boiled rice and
 the whole seasoned with minced ham
 or tongue, pepper, salt, made mustard
 and a little lemon juice. Fill the paste
 into the hollow whites.

Minced ham and boiled rice mixed
 together and filled into individual bak-
 ing dishes with an egg on the top
 make an excellent luncheon dish. Fill
 the little dishes about half full of the
 rice and the ham mixture and put
 them into the oven until they are
 heated through. Then remove, drop
 an egg on to each, with bits of butter,
 salt and pepper over the top, and bake
 until the white is set.

Tasty Lenten Dish.
 Boil four eggs till very hard, then
 place them in cold water and remove

Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could
 not live. The Tablets cured her.—MR. E. R. McBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would
 die. We could find nothing to help him. I was given a sample package of three Hennequin
 Tablets; we used them; I saw a change at once. We secured the Tablets and our baby im-
 proved every day, and is now a bright, fat, good natured boy; you could not believe he was the
 same child. They certainly cured my baby and saved his life. I believe them to be the best
 medicine ever sold for babies. Mothers if your babies are not well take my advice and try these
 Tablets.—MRS. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not
 offer to give them away and prepay them. If your baby is not well send for trial package.
 Hennequin Tablets have the letter "H" stamped upon them—this is your guarantee

A Representative will
 call for your Orders and
 Instructions.

Auditors' Report, Town of Napanee

For the Year ending December 31st, 1911.

To the Mayor and Councillors of the Town of Napanee.

Gentlemen,—We, your Auditors, beg to report as follows, viz.:

We have audited the accounts of the Town Treasurer, the Secretary-Treasurer of the Board of Education and Treasurer of the Electric Light and enclose statements of same.

We find vouchers for all entries both Receipts and Expenditures.

Your Town Clerk holds the Town Treasurer's Bonds, which are from the Dominion Guarantee & Accident Co., for \$8000.00, which Bonds we consider good and sufficient.

During the year your Town Treasurer has collected Dog Tax to the amount of about \$75.00, which amount is not included in the receipts for the year. The explanation of this is that there are several dogs not registered nor taxes paid, and we have been informed that some owners refuse to pay this tax. We bring this matter up that the Council may take what steps they may deem necessary in the matter.

We congratulate the town on its officers. Not only are the Books correct, but they are kept in a neat manner, making your Auditors' task easier than might be.

The Treasurer's Book is nearly full, and a new one will be required before the year is out.

All of which is respectfully submitted.

JOHN T. GRANGE,
A. E. PAUL,
Auditors.

On motion Council adjourned until the call of the Warden.

BY-LAW NO. 274.

To appoint a County Engineer over County Roads and Bridges and to define his duties and powers.

Passed March 15th, 1912.

The Council of the Corporation of the County of Lennox and Addington enacts as follows:—

1. That Andrew W. Gray, of the City of Kingston, in the County of Frontenac, Civil Engineer, be and is hereby appointed County Engineer over County Roads and Bridges of the County of Lennox and Addington, at a salary to be computed at

built or repaired shall be constructed under the direction of the County Engineer in conjunction with the Reeve of the Municipality in which said bridge or culverts is being built or repaired, the said County Engineer to prepare proper monthly pay lists with vouchers attached certifying that said expenditures on bridges or culverts are correct, and in case of disagreement as to the building of the proposed bridge or culvert the same shall be decided by the Roads and Bridges Committee.

10. The County Engineer shall use County machinery when available; if not available he shall hire other machinery, cost of said machinery hired only to be charged to machinery account.

11. All road and bridge construction shall be performed as nearly as possible in accordance with the standard laid down by the Highway Branch of the Public Works Department.

12. The County Engineer shall be required to prepare and present an annual certified statement for the Public Works Department, with the assistance of the Warden, Clerk and Treasurer, such as may be required by the Department.

13. The wages to be paid by the County Engineer to employees shall be in the discretion of the County Roads and Bridges Committee, which Committee shall give all necessary directions concerning same to the said County Engineer.

14. Prior to entering upon his duties under this By-law, the said County Engineer shall furnish a Guarantee Company bond in the sum of \$1000 conditioned for due performance of his said duties and the County shall be at the expense of the said bond.

W. G. WILSON,
County Clerk.

G. A. WARTMAN,
Warden.

REPORT OF M. R. REID, I.P.S.

Sharbot Lake, 1912.

To the Warden and Members of the County Council:

Gentlemen,— I hereby beg leave to submit the report for the Public Schools of Addington North for 1911.

During the year there have been thirty schools in operation, of which twenty-seven have been open for the full year, while three have been in operation for some eight months. There are seven schools in Denbigh, A. & A., seven in Kaldar, A. & E., and sixteen in Sheffield. No. 2, Kaldar, and No. 6, Sheffield, employed two teachers, thus making thirty-two departments with thirty-two teachers.

Of the thirty-two teachers, three were men and twenty-nine women. One held a First class certificate, three hold Normal certificates, seven had Third class certificates and the remaining twenty-one were granted Temporary certificates. Of the twenty-one, ten have spent three or more years in a High School, six have attended two years, two have attended one year, and three have not attended a High School. The attempt has been made, and with a fair measure of success, to provide the schools with teachers that have had as much training in the High Schools as possible. For a more complete statement I would refer you to the report published in the minutes of 1912.

The highest salary paid to male teachers was \$600.00, to a female \$525.80. The average salary was \$332.00 with an average to male teachers of \$417.00, to female teachers \$323.00. The salaries have been advanced as much as could be expected, but there is no doubt that further advancement will be made as better qualified and more efficient teachers are provided.

The financial reports showed aggregate receipts and payments for 1911 as follows:

Receipts.	
Balance from 1910.....	\$ 3661 48
Township and County Grants.....	5739 90
Government Grants.....	3357 83
Special Section Taxes.....	2853 13
All other sources.....	757 94
Total Receipts.....	\$16330 28
Payments.	
Teachers' Salaries.....	\$ 9309 52

PLAYS MODERN SOCIETY.

Clergyman Says Rich Must Be Driven Out of Churches.

Two prominent English clergymen, Bishop Welldon and Canon Peter Gibson, both of Manchester, have given utterance to some remarkable statements bearing upon the responsibility of the church in social reforms. Canon Gibson does not hesitate to say that, sooner or later, the church will have to excommunicate the rich man. He knows a case where a woman was given \$50,000 to spend on dress, and declared she must be far more offensive in the eyes of God than the poor, wretched girl on the street.

Another woman he instances who has nineteen servants to wait upon her and this he condemns. "I may be told," he says, "that she does good by supplying work and wages to these nineteen people. But on that standard she does less good than a fire, railway accident or flood, all of which provide more work for a greater number of people as a result of the evil they have done."

"Anyone except an infant, an invalid or an imbecile should receive no more service from other people than they render to other people. The person who accepts more than he renders in return must be excommunicated, unless there is reasonable excuse of infancy, weakness of body or other infirmity. To possess more than you can enjoy should be regarded as being as vicious and vulgar as to eat more than you can digest, or drink more than you can carry."

The bishop also points out flaws in modern society.

"The present age," he says, "is proud of itself. It is the most conceited age in history; but, apart from the tropes of applied natural science, there is not much upon which it can justly pride itself."

"Spiritually, it is a poor age. It is an age of lofty profession and—I will not say low performance—but of performance far lower than the profession. It is characterized not by self-discipline, or self-sacrifice, but by the spirit of self-pleasing and self-indulgence."

"It is well that men and women who dwell in mansions should learn by personal observation what life is like in the slums of a great city."

"It seems to me that motorists, with the reckless, contemptuous disregard too often shown for the poor, whose homes and gardens they ruin, and whose children's lives they endanger and sometimes destroy, are in no slight degree responsible for the strong democratic feeling which has arisen in the minds of the people."

"It is not equality which the modern world needs; it is sympathy."

A Wily Mocking Bird.

A naturalist tells of a droll exhibition of fun evinced by a mocking bird. It had only recently been captured and was placed near another cage in which were two canaries, both excellent singers. The mocking bird at first seemed to be struck dumb by his voluble neighbors; but, as it turned out afterward, he was only biding his time. For several days he remained silent, taking notes, until he had mastered their song, when one day, without even a preliminary rehearsal, he burst out into a canary song in a loud, ringing tone that struck his yellow throated neighbors mute with astonishment. After this it was a favorite amusement of his to drown the voices of the canaries with his own loud notes whenever they attempted to sing.—Detroit

and other County matters, as read and on motion was adjourned until tomorrow at 9.30 a.m.

by Mr. Lovst, seconded by Mr. K., that R. W. Longmore, be paid for expenses in connection

City of Kingston, in the County of Frontenac, Civil Engineer, and is hereby appointed County Engineer over County Roads and Bridges of the County of Lennox and Addington, at a salary to be computed at the rate of 5 per cent. on monies expended on County Roads and Bridges under the provisions of the Highway Improvement Act, as reported to the Government at the end of the season.

2. The said County Engineer is to receive the sum of \$75.00 monthly on account of said salary, commencing the first of April, 1912, and the balance due him is to be paid to him when the said County Engineer's report to the Public Works Department has been made and the County Treasurer is hereby authorized to make the payment provided for in this section, to the said County Engineer.

3. The County Engineer is to be supplied with all necessary stationery, such as pay lists, receipt books, order books and stationery such as necessarily required by him in the performance of his duties as such County Engineer, and he is also to receive payment of all necessary telephone and telegraph charges and postage incurred in connection with his duties as County Engineer.

4. The said County Engineer shall have power to purchase all necessary tools and oils and shall have supervision over all machinery and shall have full power as to when such machinery shall be used in each municipality. The Reeve of each municipality shall have full power to designate roads where the monies appropriated for that municipality shall be expended.

5. The said County Engineer shall keep all of the machinery under his care in proper repair, only allowing such stones to be crushed as will not injure the crusher. He shall have power to choose his locations for setting the machinery and shall settle all claims for lands so used and for all material used in construction of said roads. He shall have full power to hire men and teams for the operation of all machinery and to dismiss any man when deemed advisable by him. It shall also be his duty to see that the machinery as far as possible be in readiness to start work each day at 7 o'clock a.m., and to continue till 6 o'clock p.m., allowing one hour only at noon.

6. The said County Engineer shall enter upon his pay lists provided by this Council the names of each party employed, the capacity in which he was employed, the rate per day, the time he labored, the material supplied, the sum total paid for labor and material, the amount paid for employment of machinery and the nature of the machinery used, which pay lists shall be accompanied by proper vouchers. The County Engineer shall present such lists monthly properly certified to by him, to the Warden and Clerk, who shall issue orders on the Treasurer sufficient to meet the demands on said lists.

7. The said County Engineer shall not resign his position as County Engineer without giving at least one month's notice of such intention to resign, and he shall also in the event of discharge by this Council be entitled to at least one month's notice of such intention to discharge him.

8. The sum of \$200.00 shall be placed in the hands of the said County Engineer upon commencing work to be returned to the County Treasurer at the end of the season.

9. Any bridges or culverts upon said County Roads requiring to be

The general school rates in the three municipalities were the same as last year.

The schools participating in the assisted grant, with the amounts as apportioned, are:

Denbigh, A. & A.—No. 1 \$64.00, No. 2 \$62.00, No. 4 \$60.00, No. 5 \$94.00, No. 6, \$52.00, No. 7 \$64.00, No. 8 \$42.00.
Kaindara, A. & E.—No. 1 \$45.00, No. 2 \$28.00, No. 3 \$75.00, No. 4 \$60.00, No. 5 \$20.00, No. 7 \$20.00, No. 8 \$60.00, No. 11 \$61.00.
Sheffield.—No. 11 \$42.00, No. 12 \$28.00, No. 13 \$44.00, No. 14 \$32.00, No. 15 \$17.00, No. 16 \$20.00.

These assisted grants were composed of a County grant of \$475.00 and a Government grant of \$725.00.

The total Legislative grant was \$2555.70 and the Government grant for Equipment and Accommodation \$342.00. The Government grant to Libraries was \$16.56, but this does not show clearly the amount expended for books, as in a good many cases the sum spent for books was less than \$10, which is the smallest amount that will draw the Government grant.

The total enrollment was 958, of whom 479 were boys and 479 were girls, with an average daily attendance of 404. This makes an average daily attendance per teacher of 12.6.

The classification shows that there were in the Primer 326 pupils, in the First Reader 109, Second Reader 223, Third Reader 151, Fourth Reader 120, Fifth Reader 29.

From a study of the preceding statistics and a comparison with those from 1910 the following may be deduced:

1. The special grants to the schools have been liberal. They are much appreciated, for without them the problem of providing the necessary salaries for teachers would be a more serious one.

2. The average increase in salary was \$31.62, and while this is generally satisfactory, it has not been sufficient to retain the teachers who were in charge in many of these schools in preference to schools in better situated communities in other inspecionates where larger salaries are possible. During the year some fifteen teachers have availed themselves of the opportunity, and their places have largely been taken by inexperienced persons.

3. There has been a decrease in enrollment of sixty pupils. This, no doubt, is in some measure due to families leaving to make homes in other parts of Canada for themselves.

4. The average cost of maintaining a pupil for the year in school has been \$12. If we deduct from the total expenditure the Government grants we find that the average cost per pupil for the year is some \$9.00. If it were possible to secure more regular and a full attendance the average would be very much lower.

During the year considerable advancement has been made. The academic standing of teachers is better. The consolidation of Union S. S. No. 3, Sheffield, and 28, Camden, with No. 6, Sheffield, promises good results. Even in cases where there has been some complaint it is found that this is the result of the new requirements not being thoroughly understood. Your support, both in the matter of assisted grant and in the aid given to the Continuation School at Tamworth has been greatly appreciated.

Yours very truly,
M. R. REID.

Hockey Match.

For good fast hockey playing get your skates sharpened accurately by the old reliable, W. J. Normile. Skates sharpened while you wait and bolted and riveted to the boots. Prices right.—Napanee Bicycle and Automobile Works.

City Dairy Ice Cream Bricks, Maple Walnut, Neapolitan and Vanilla with Cherries, generally on hand. Take one home with you on Saturday and use it for Sunday dinner. Jessop's.

CAN YOU ASK MORE ?

Your Money Back for the Asking. You Promise Nothing.

We are so confident that we can furnish relief for indigestion and dyspepsia that we promise to supply the medicine free of all cost to everyone who uses it according to directions who is not perfectly satisfied with the results. We exact no promises and put no one under any obligation whatever. Surely nothing could be fairer. We are located right here where you live, and our reputation should be sufficient assurance of the genuineness of our offer.

We want every one who is troubled with indigestion or dyspepsia in any form to come to our store and buy a box of Rexall Dyspepsia Tablets. Take them home and give them a reasonable trial, according to directions. If they don't please you, tell us and we will quickly return your money. They have a very mild but positive action upon the organs with which they come in contact, apparently acting as a regulative tonic upon the relaxed muscular coat of the bowel, thus overcoming weakness, and aiding to restore the bowels to more vigorous and healthy activity. Three sizes, 25c, 50c, and \$1.00. Remember, you can obtain Rexall Remedies only at our store—The Rexall Store, T. B. Wallace, Druggist.

CURIOSITY Prompted Many Women To Try PURITY FLOUR

THEY were curious to see exactly what results would be produced by flour consisting entirely of the high-grade portions of the best Western hard wheat.

They were curious to know more about a flour that contained none of the low-grade portions, which are found in every wheat berry, but which are separated and excluded from the high-grade in the process of milling PURITY FLOUR.

THEY were curious to know whether an ALL HIGH - GRADE hard wheat flour was really superior to a mixed hard and soft wheat flour.

They were curious to see and taste the kind of bread, buns, biscuits, cakes and pies PURITY FLOUR would make.

Curiosity prompts you to seek the knowledge they discovered. It's urging

you to try PURITY FLOUR.

REMINDER: On account of the extra strength and extra quality of PURITY FLOUR it is necessary, for best pastry results, to add more shortening than you are accustomed to use with an ordinary flour. Add more water when making bread.

Add PURITY FLOUR to your grocery list right now

HANDLING BARBED WIRE.

Homemade Contrivance That May Help In This Ticklish Business.

The Iowa Homestead, from which these pictures and this description have been taken, says:

Following is a description of a good, cheap barbed wire spool that a subscriber of Lyon county, Ia., forwards: Take a piece of 2 by 6 six feet long and rip it in two and nail the two pieces together in the center to make

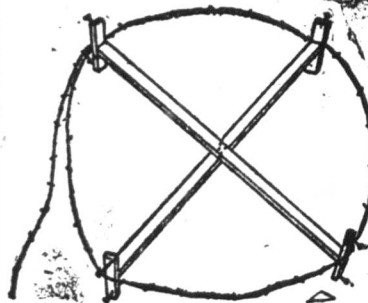

SPOOL FOR BARBED WIRE.

them like the letter X. Then take four pieces about twelve inches long and nail on the ends of these first two pieces, nailing them on crossways, and drive nails in both ends to hold the wire on.

Now lay your barbed wire out a short distance from the fence—a few feet is plenty—and fasten one end of the wire on the end of one of these twelve inch pieces and roll the spool along over the wire, and you can take it up as fast as you can walk, as the spool will be as high as a man's head, and he can stand up straight to take up the wire, and it can be unrolled just as easily.

To unroll wire from the spools on which it comes take two pieces of 2 by 4 four feet long and bore a hole in one end about the size of the holes in a barbed wire spool; then take and nail a wide board or a few narrow boards about eighteen or twenty inches long on these 2 by 4's, and have them just a

CROSS SECTION OF BARBED WIRE SPOOL.

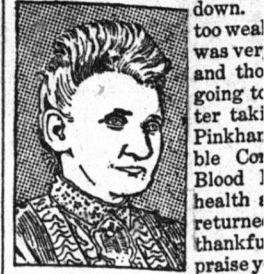

little wider than the spool, and nail a narrow board on the opposite end of the 2 by 4's from the holes.

Then take a stick that will go through the holes, put the spool of wire in between and run the stick through the 2 by 4's and barbed wire spool and take hold of the narrow board on the other end and pull along on the ground where the fence is wanted. You can unroll barbed wire with ease and never get cut by the wire.

CRITICAL TIME OF WOMAN

Sea Dragons.

Among the most remarkable of fish living in the vast the ocean are those known as dragons." Their bodies are in a bony armor and they upright position, propel themselves by rapid vibrations of the fin. These strange creatures along the coast of Australia the seas of that region.

The sea dragon is a member of the sea horse family, but it is transformed by extravagant appendages. These are not mere but material aids in the struggle for existence. The is richly ornamented with flapping ribbons of skin, reminds one very much of some creature that was adopted as the Chinese dragon. But these ornaments have a purpose other than being merely decorative, closely resemble the fringed weed amid which this strange lives that protection afforded. In this disguise ality is lost, and the ravages of the sea may pass it a day and yet, save by accident, they would never

Modern Slaughter House Method
Painless and Rapid.

INSTANT DEATH IS ASSURED.

One Dexterous Thrust Through the Animal's Head by an Expert Workman Ends Consciousness—How the Carcass is Skinned and Dressed.

The easiest way you could possibly think of is the way sheep are killed in the packing houses. Most persons mistakenly imagine that they are treated horribly and see in their minds a bloodthirsty man, with shoulders like hams, standing over a poor, defenseless sheep with a bludgeon in his hands ready to send the creature straight to the promised land. But there is where the sentimentalist goes completely wrong, for if there is an animal that is treated right—in speaking of its death—it is the sheep. There is only one thing that doesn't look as though death was absolute pleasure for the sheep, and that is right at the very start of the killing operation.

The sheep are driven from the yards up a long chute, and when they enter the pathway a leader sheep puts himself at their head to take them up into the killing room. These sheep are trained and are nearly always black so that there will be no mistake made and the leader sheep killed.

This leader takes the animals up the chute to a pen that will hold about fifty sheep. Here a man catches them, two at a time, and shackles them by their hind legs. This is the operation referred to as the only one painful to the sheep.

The animal is then swung on to what is called the Ferris wheel. This wheel is constantly revolving, and as it reaches a certain spot the sheep are transferred to a track from which they hang head downward. At that point their suffering ceases, for the next workman is the man who kills them.

The killing process is one that is absolutely painless to the sheep. The workman is adept and never misses the mark at which he strikes. With a sharp knife in his hand, he moves down the row of hanging animals, and as he comes to each one he feels of the head just behind the ears and finds the point where the bones of the head leave an opening. In this the knife is thrust and goes through the head of the animal, completely severing on both sides a large artery. The sheep is killed instantly. Five hundred sheep can be banded every hour at this point. They are then "pated," an operation that consists of skinning the

Look at Yourself.
Notice your sallow skin, whitish tongue, pale lips, dark hollowed eyes and remember that Merrill's System Tonic is what you need. There can be no worn-out, tired feelings, dyspepsia, constipation and loss of sleep or strength where System Tonic is used. Don't neglect yourself. Insist on having Merrill's System Tonic. Sold and recommended by T.B. Wallace, Druggist.

spot below the neck. The fore legs are then broken and cut off to be sent to the bone room.

The fact that there is a time for everything and one man to do just his part and no more is emphasized in the sheep room when one sees just one hind leg skinned by one man and the other skinned in an entirely different operation. The sheep is then put on what is called the endless chain. This chain consists of hooks at intervals and is constantly moving, making the rounds of the room in about twenty minutes. Along this chain are the workmen, and as the sheep is passed on to them by the chain they do their work and wait for the next carcass.

After the two hind legs have been skinned the back is partly skinned and the animal is passed on to the next man who is called a "pelter." He grasps the pelt just above the hind legs, and, with a few deft twists of it, it is pulled off and the sheep passed on to the next workman.

After being skinned the sheep are carefully washed and wiped, a new towel being used on every animal. An endless chain is in progress here also, for when a towel is used it is thrown into a vat of boiling water, washed and put into a drier to be used over and over again. After the animal has been washed the head is taken off and the neck washed in the same manner as the rest of the carcass. The government inspector then gets it, and it is subjected to a rigid examination, after which the stamp of approval of the United States is put on.

After the head is taken off it is sent to the floor below, where the tongue is taken out and the remainder of it sent to the bone room.

There are two ways of dressing the sheep. Some of the buyers insist on having the caul fat with the animal, while others do not care about it. If the fat is desired it is put on the hind part of the animal, covering about one-half of the body, and is then split, revealing the carcass shorn of the viscera.

The dressed animals are hung on overhead tracks and put on an elevator to be sent to the cooling room.—St. Louis Globe-Democrat.

Ancient Proofreading.
The editions of books printed 200 or 300 years ago are almost entirely free from typographical errors, which may be attributed to the fact that early publishers were generally eminent scholars and themselves gave much attention to the revision of their proofs. After reading the proofs they frequently turned them over to other scholars with the request to revise and correct, and as the printer's time was then deemed a matter of small consequence a perfection was attained which is seldom equaled by modern printers.—Exchange.

The man who does you a wrong has need of pity.

It wouldn't make so much difference what the past was if it were not so near akin to the present and so related to the future.

The fellow who is profiting by it isn't the one to make a roar about a mistake.

The man who knows when he is licked is pretty likely to stay licked.

end and pull along the ground where the fence is wanted. You can unroll barbed wire with ease and never get cut by the wire.

WHEN YOU MAKE REPAIRS.
In making repairs upon the premises it is an economic loss to do shoddy and temporary work. We should feel that the farm and the home deserve the best attention and that all work done upon the farm and around the place should be worthy of the one who lives upon the farm. Do not permit habits of carelessness to come into your life.

CO-OPERATION.
Call your family together and form a closer union. Ask for suggestions on how the income of the farm may be increased and the profits may be invested. Let each pull together for the good of the home.

Silage For Ewes.
The Iowa experiment station the past year wintered some ewes upon different rations, two of which are taken in contrast to show the value of silage. The average feed required in the case of grain and clover was 1.8 pounds grain and three pounds clover daily. When silage was added to the above ration the feed consumption per ewe was as follows: 3 to 4 pound grain, 2 pounds clover hay, 2.5 pounds corn silage. This ration cost not more than 2 cents. The special value of the silage was that it reduced the amount of grain required and also increased the ewe's capacity for cheap roughage. The 3.5 pounds silage practically replaced a penny's worth of clover and grain and produced as good results. This would give silage in this particular case a cash value of \$5.70 per ton. Silage actually costs but from \$2 to \$2.50 per ton, allowing market price and field profits on the corn in it. Its addition to the ewes' ration is a profitable venture.

Where the Sheep Came From.
Excepting the Rocky mountain sheep, or "bighorn," all of the breeds of sheep now known in North America were imported from Europe, and, with the exception of the Merino, which came from Spain, they all came from England, where they originated. American breeds of sheep are classified as fine woolled, medium and coarse woolled. To the fine woolled breeds belong the American Merino, the DeLaine Merino and the Rambouillet. The medium woolled breeds include the Shropshire, Southdown, Tunis, Dorset, Cheviot, Suffolk Down, Hampshire Down and Oxford Down. The coarse woolled breeds are the Leicester, Lincoln and Cotswold.—Kansas Farmer.

FICIAL TIME WOMAN'S LIFE

40 to 50 Years of Age.
It May Be Passed
in Safety.

Wellington, B. C. — "For a year during Change of Life I was all run down. I was really too weak to walk and was very despondent and thought I was going to die, but after taking Lydia E. Pinkham's Vegetable Compound and Blood Purifier my health and strength returned. I am very thankful to you and praise your medicine. I advised several women who suffered from this if you wish." — Mrs. J. MORRIS, South Wellington, B. C.

For medicine for woman's ills has such wide-spread and unequalled success. We know of no other which has such a record of success as Lydia E. Pinkham's Vegetable Compound. For more than 30 years it is the standard remedy for women's ills such as inflammation, ulcers, irregularities, periodic nervous prostration, and we are unequalled for women during change of life.

Have the slightest doubt Lydia E. Pinkham's Vegetable Compound will help you, write E. Pinkham Medicine Co., Lynn, Mass., for our letter will be opened, and answered by a woman, in strict confidence.

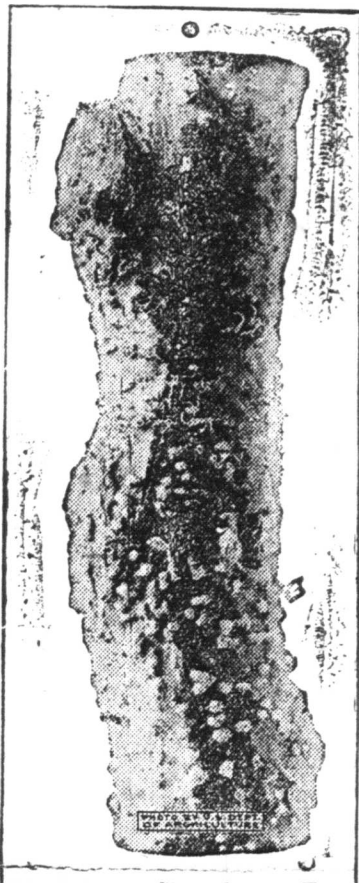

Sea Dragons.
The most remarkable kind of animal living in the vast reaches of the sea are those known as "sea dragons." Their bodies are encased in armor and they swim in an upright position, propelling themselves by rapid vibrations of the back. These strange creatures are found along the coast of Australia and in the Pacific region.
The sea dragon is a member of the eel family, but it is strangely decorated by extravagant trappings of armor and bony plates which aid in lessening the drag of its existence. The sea dragon is ornamented with loose and flapping skin, so that it is not very much of the creature that was so long ago described by the Chinese national emperors. These ornate trappings impose other than that of mere decoration, for they so resemble the fronds of seaweed which this strange creature uses for protection. Its life is in this disguise its person, and the ravening wolves may pass it many times without, save by the merest chance, they would never discover they were passing not seaweed.

Farm and Garden

CHESTNUT BARK DISEASE.

Locating and Fighting Infection Centers Only Known Means of Control.
The chestnut bark disease was first recognized as a serious disease in the vicinity of New York city in 1904, and the first publication regarding it appeared in 1906. There is reliable evidence, however, that it was present on Long Island at least as early as 1893. Its origin is unknown, but there is some evidence that it was imported from the orient with the Japanese chestnut. This view is not, however, held by all investigators. But, whatever may have been its time or place of origin, it is certain that it has now spread into at least ten states.

The bark disease appears ultimately to exterminate the chestnut trees in any locality which it infests. Three years ago the financial loss from this disease "in and about New York city" was estimated at "between \$5,000,000 and \$10,000,000." The agricultural department writers regard \$25,000,000 as a conservative estimate of the financial loss from this disease up to 1911. In many localities the greatest damage has been among chestnuts grown for

DISEASED CHESTNUT BARK.

ornamental purposes, which have a value greatly in excess of their value

Do not fail to hear the AMBEROLA —THOMAS A. EDISON'S highest development of his own instrument, the Edison Phonograph

Musically—the Amberola has the truest, surest, smoothest tone, the most lifelike reproduction. Exactly the right volume of sound for the home. It has the sapphire reproducing point, which is permanent—no changing needles. It renders all compositions *completely*, without cutting or hurrying, on Edison Amberol (four-and-one-half minute) Records—and all short selections on Edison (two-minute) Records, as well.

Artistically—a masterpiece of the cabinet maker's art, as beautiful to look at as it is wonderful to hear. You have your choice of four finishes, Circassian Walnut, Mahogany, Golden Oak and Mission Oak.

Mechanically—perfect. The silent motor will play five Amberol Records, each four-and-one-half minutes long without rewinding.

There are various other styles of Edison Phonographs at almost any price you wish to pay—and each offers *definite* Edison advantages. But the Amberola is the greatest of all. Hear it today.

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Edison Amberol Records. Get complete catalogs from your dealer or from us. Edison Phonographs, \$16.50 to \$240.00. Edison Standard Records, 40c. Edison Amberol Records (play twice as long), 65c. Edison Grand Opera Records, 85c to \$2.50.

LESSON FROM ALASKA.

Northern Territory Increases Its Potato Yield by Careful Cultivation.

From Alaska comes a lesson in potato raising. The chief vegetable crop of the territory is the potato, but in order to grow it successfully suitable location as to soil, slope of land and southern exposure has to be selected, and even then to secure a thoroughly mature crop much depends on the variety that is grown and the method of culture. The growing season in Alaska is exceedingly short, ranging during the years 1906 to 1910, inclusive, from 84 days to 107 days, the former occurring in 1910 and the latter in 1907. Under such conditions, therefore, any process that will facilitate the development of the potato after it has been put into the ground is of advantage in helping to secure a mature crop.

This was the problem confronting the experiment stations in Alaska, according to the annual report for 1910, and a test was made of the effect on the maturity and yield of sprouting the seed before planting it. The seed potatoes were placed in flats in the greenhouse and slightly covered with earth several weeks before planting time and when planted had sprouts varying

THE BROWN SWISS BREED OF CATTLE.

The Brown Swiss breed is the least numerous of the standard breeds of dairy cattle. In fact, its numbers in the United States are so small that if the quality were not good the breed would have ceased to exist here. Importations of Swiss cattle are beset with greater obstacles and expenses than is the case with any other dairy cattle, writes E. M. Barton in Hoard's Dairyman.

Twenty years ago there were perhaps a dozen herds that could be located without any great effort, no one herd containing more than about a dozen cows.

Now, after twenty years of attention to business, the situation is improved to such an extent that there are more than fifty herds in the country averaging over fifty cows in a herd, besides more numerous smaller herds, and the owners are all well satisfied with the results they are getting. A price of \$300 for a well bred and well grown bull calf is not abnormal. A price of \$1,000 has been offered and refused for

DISEASED CHESTNUT BARK.

ornamental purposes, which have a
value greatly in excess of their value
as lumber.

No method of immunizing individual
trees against the bark disease is yet
known, and no method of treating or
curing them when once attacked is
certain in its results. While this is
unfortunate from the standpoint of
the owner of orchard trees and large
ornamental trees of great individual
value, no method of dealing with single
trees—surgery, medication, spray-
ing, etc.—however successful in itself,
would meet the demands of the present
situation. It is not practicable at
present to apply any individual meth-
od of treatment to forest trees; the in-
dividual tree is not worth it and will
not be for many years.

Fortunately, however, there is a
method of dealing with the situation
which is applicable to the country as a
whole and which, so far as tested, is
practicable. The disease advances
but slowly in a solid line, but instead
spreads from isolated centers of infec-
tion, often many miles in advance of
the main line of disease. It therefore
seemed probable that if these advance
infections could be located at a reason-
ably early stage they could be
eliminated at relatively little expense,
thus preventing further spread from
these points at least. It is believed
that this method of attack will prove
practicable and if carried out on a
large scale will result ultimately in
the control of the bark disease which
has done so much damage.

Adapting Crops to Climates.

The farmer cannot change his cli-
matic environment, but he can grow
crops adapted to it. There are two
ways of doing this—by the breeding
and selection of hardy plants and by
the introduction of new species and
varieties adapted by nature to new
locations. The experiment stations in
the different states and territories have
been doing work along the first line,
and the federal government, through
the bureau of plant industry, has been
seeking hardy varieties of plants from
all parts of the world for introduction
into our own country.—Country Gentleman.

FOR THE "OLD MAN."

Are you setting a good exam-
ple for the young farmers in
your neighborhood? If not, be-
gin anew this year and be a
worthy example for better agri-
culture.

MACHINERY COSTS MONEY.

Ever thought of oiling machin-
ery before you put it away? It
will prevent the gears, chains
and bearings from rusting and
how smoothly they will run next
season! Have a system in shed-
ding your machinery. The im-
plements that will be needed first
next spring should be next to the
door so they will be no trouble to
get out in their order as needed.

the maturity and yield of sprouting the
seed before planting it. The seed po-
tatoes were placed in flats in the green-
house and slightly covered with earth
several weeks before planting time
and when planted had sprouts varying
in length from half an inch to three
inches. These were compared in their
yields with potatoes that were not
sprouted.

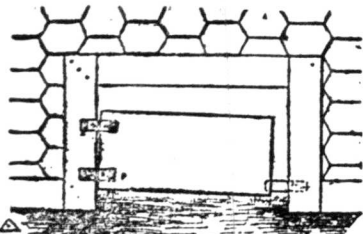

Similar tests were made at the Sitka
station, near the coast, and at the
Rampart station, inland. At the for-
mer the rows of the sprouted potatoes
were distinguishable above the surface
fully two weeks earlier than the rows
of the unsprouted potatoes, while at
Rampart the difference in time be-
tween the appearance above ground of
the sprouted and unsprouted potatoes
ranged from eight to twenty days, ac-
cording to the variety, and the differ-
ence in blooming period from twelve to
twenty days.

The Sitka station tested twenty-two
varieties, with the result that sprouted
potatoes gave uniformly the best yield,
averaged larger and were better ma-
tured than the potatoes raised from the
unsprouted seed. At the Rampart sta-
tion the gain in yield ranged from 21.3
to 73.3 per cent.—Country Gentleman.

TEACH BIDDY A LESSON.

And Cure Yourself of the Hen Chasing
Habit by Using This Gate.

Barrels of perspiration may be saved
by the poultry gate shown herewith,
which is reproduced, with the article,
from the New England Homestead.
Whoever has unintentionally acquired
the hen chasing, hen cussing habit
may cure himself with this little de-
vice. In the fence, preferably at a
point near where the fowls are fed, a
light little door about 10 by 12 inches
is hung on the inside of the yard so as
always to swing shut without springs.
It is stopped from swinging outward

HANDY GATE FOR POULTRY YARD.

by the peg shown at the right. Mrs.
Hen, returning repentant from the gar-
den, will poke her head into every
mesh of the fence in her efforts to re-
join her happy companions. The gate
will thus allow her to enter without
excitement or comment from the lord
of the harem or from the irate owner.

But another advantage may be gain-
ed by using the gate in connection with
the laying pens. If two gates are used,
one opening inward in front of the nest,
the other opening outward at the back
or the side, so that the hens may
go into another yard after laying, the
poultryman may know which hens
have and have not laid. Thus he may
avoid the trouble usually connected
with ordinary trap nests.

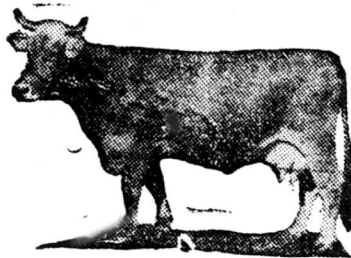

Paper Bag Cookery.

It is not a fad, but the most sanitary

more numerous smaller herds, and the
owners are all well satisfied with the
results they are getting. A price of
\$300 for a well bred and well grown
bull calf is not abnormal. A price of
\$1,000 has been offered and refused for
typical cows.

The merits of the breed are not yet
so well known or so generally ac-
knowledgeed as the breed deserves.
Thoughtful farmers sit up and take
notice of a breed whose chief charac-

It is a general characteristic of
Brown Swiss cows to show a high de-
gree of efficiency in converting feed
into milk or into flesh and a pro-
nounced characteristic that they are
not of a nervous disposition or hab-
it. The Brown Swiss is a long lived
breed. At eleven or twelve years of
age the cows are in their prime.
The Brown Swiss cow here shown
is a typical specimen of the breed.

teristic is that it avoids extremes in
characteristics, but keeps the middle of
the road, marching between the Chan-
nel island breeds on the one hand and
the Holland breeds on the other; a
breed that is built on a generous plan,
having flesh to lose when under full
flow of milk and having a frame to
carry flesh when the flow diminishes.

There are two reasons which have
caused the Swiss breed to gain in popu-
larity during these twenty years with
almost no importations of fresh blood.
The most prominent of these is the re-
sult of breeding common cows and
grade cows of other breeds to Brown
Swiss bulls. Those who have prac-
ticed this style of breeding have been
so well satisfied with it that they have
continued and extended the plan.
Where Swiss grades are known there
is ready market for the calves and
young stock.

The second cause of the increasing
favor with which the Brown Swiss
breed is held lies in the high average
records made by the pure bred Swiss
cows under good feed and care. The
first man to draw attention to the
breed in this country by developing
high producing cows was Mr. Bourquin
of Nokomis, Ill. His great work was
done very nearly twenty years ago,
and it has been followed by others
who have kept farm records and have
obtained official records for their Swiss
cows. The breed has done well in
short time contests, but it has done
better in long time contests, and the
longer the better, because a cow's value
is not based on what she will do in a
day nor a week nor a year, but in a
whole lifetime.

NEWS TOPICS OF WEEK

Important Events Which Have Occurred During the Week

The Busy World's Happenings Carefully Compiled and Put Into Handy and Attractive Shape for the Readers of Our Paper—A Solid Hour's Enjoyment.

WEDNESDAY.

The public accounts of Manitoba show a surplus of \$2,332,242.

The Dominion Textile Co. has granted a general increase to its employees.

Mr. J. H. Shepherd was elected mayor of Windsor in the place of the late Mr. Hanna.

Hon. Geo. P. Graham took his seat in the Commons, and was warmly welcomed by the Liberals.

The Whelan block at St. Mary's was burned; and the town of Acme, Alberta, almost wiped out by fire.

The Waterloo County Board of Agriculture has begun a campaign for the protection of railway crossings.

J. J. Lauzon of Winnipeg was sentenced at Montreal to three years in the penitentiary for defrauding the Dominion Bank.

A delegations of 200 or more women are in Albany, N.Y., where they will try to persuade the legislators to act favorably on the equal suffrage amendment bill.

Engineer Fred. Kingman and Fireman Cole of Norwich, N.Y., were killed in a head-on collision between two Ontario & Western freight trains at Galenta.

The steamship Rotterdam, which arrived in New York yesterday, had terrific weather at sea, and in the turmoil that occurred two of her crew were seriously injured.

A French column has had a fierce all-day engagement with the Zemmur tribes near Casa Blanca, which it defeated with little loss. The French lost two killed and nineteen wounded.

Reports reaching Tangier disclose a serious situation in Morocco City, where the population has revolted. The movement is assuming an anti-foreign character, and a German engineer has been wounded.

An anonymous donor has given \$20,000 to endow a professorship at Cambridge University in connection with the experimental study of heredity. The new chair will be called "Balfour Professorship of Genetics."

President Tregillus of the United Farmers of Alberta, said yesterday: "I believe the next legislative assembly will be made up largely of farmer representatives. We will probably have candidates in every riding."

THURSDAY.

A mad dog was shot at Orangeville yesterday.

C. M. Hays, president of the Grand Trunk, is gone to England.

The British steamer Hesperus was wrecked off the coast of Nova Scotia.

Fierce fighting took place around Tripoli, both sides claiming the victory.

Dr. Beaudry of Montreal estimates that there are over 75,000 cases of smallpox in Quebec.

Hugh McKay, a pioneer of western Ontario, died at Ingersoll in the hundredth year of his age.

John C. Ross, who shot Robert Fitzsimmons at Montreal, has been found guilty of manslaughter.

General Sheng Jun is marching on Peking with ten thousand troops to endeavor to restore the emperor to the

American tour yesterday.

Both Chambers of the Swedish Parliament agreed to the bill for expulsion of Mormon missionaries.

The snowfall was heavy in western Ontario and many street railway systems were tied up. Trains were delayed.

The Orange Grand Lodge of Ontario West closed its meeting at London, Ont., yesterday and will meet next year at Windsor.

The Government steamer Stanley is caught in the ice at the mouth of Sydney Harbor. She is well provisioned and located so the crew will not suffer.

Hon. Martin Burrell, Minister of Agriculture, has decided to divide the work which was formerly undertaken by Dr. Rutherford, live stock commissioner.

An ice bridge at Niagara that formed immediately after its predecessor broke away on Feb. 4, carrying three people to death, went out early yesterday.

The Brantford Board of Trade proposes to raise sufficient funds to establish an industrial commissioner who will be assisted by an expert committee of five members.

King George has conferred the coveted Order of Merit, which is granted only to the most eminent persons in any walk of life, on Sir Joseph Thomson, the great scientist.

Hon. Frank Cochrane, Minister of Railways, as soon as Parliament has prorogued, will go down to the Maritime Provinces on a tour of inspection in order to become familiar with conditions there.

MONDAY.

Dr. H. Boucher of Peterboro died on Sunday.

The snowfall in Toronto during the winter amounted to over 64 inches.

Captain Wm. Tate Robertson, one of the pioneer captains of the upper lakes, died at Owen Sound yesterday afternoon.

Mr. Asquith invited representatives of miners and colliery owners to meet him in conference as to details of minimum wage bill.

Mr. O. L. Stevens is in a critical condition at Mount Forest Hospital as the result of the recently railway accident at Durham.

Great anxiety is displayed in St. Catharines over a raid on a large crap game in the eastern end of the city. Fifteen men were caught.

The wholesale price of bread has gone up one cent a loaf in Ottawa, which will mean that the retailer will have to pay seven and nine cents a loaf.

H. Mussel, C.P.R. yard foreman at North Bay, was instantly killed Saturday night by falling under a moving freight train. He leaves a wife and three children.

The old U. S. battleship Maine, resurrected after four years' burial in Havana harbor, plunged with her colors flying to her everlasting rest, 600 fathoms deep in the gulf yesterday.

Several arrests have been made in connection with the attempt to assassinate King Victor Emmanuel last week. Antonio Dalba insists that he is alone responsible for the attempt.

The death occurred in Montreal on Saturday of Dr. J. C. Cameron, a professor of obstetrics at McGill University, at the age of 60. Deceased was educated at Upper Canada College and McGill University.

Three minutes after the express train which left Salisbury, N.B., for Albert Saturday passed over the big steel bridge across the Petitcodias, it collapsed, three spans being swept away by the ice and freshet. The train was crowded.

BILL HARSHLY TREATED

Mr. Gooderham's Municipal Act Amendments Mutilated.

The Government Finds the Twelve Proposed Clauses Far Too Sweeping—Mover Proposed to Have All Wires Put Underground—Jameison Wants Medical Registration Between Provinces Made Uniform.

Toronto, March 19.—Not a gentle slap on the wrist, but a real healthy swat on the solar plexus did Geo. H. Gooderham's bill, embodying twelve clauses to amend the Municipal Act, receive when it came up for its second reading. After Hon. W. J. Hanna and Sir James Whitney had taken many biffs at it, the bill was sent to the municipal committee, where, by the looks of things, it may be still more ruffled.

Hon. Mr. Hanna considered that clause three was extraordinary. This clause aimed at street railways, telegraph and telephone companies, compelling them to remove all poles and wires from the streets and placing the wires underground.

"I scarcely expect to see this pressed in the committee," said Mr. Hanna. "It should not be given much consideration, and, besides, there is another bill now before the House in which these matters will be taken care of."

Number nine clause, thought the Provincial Secretary, was decidedly far-reaching. It was worded this wise: "For preventing, regulating and controlling the location and erection, within cities having 100,000 or over, of garages, apartment houses, tenement houses, or any buildings designed or intended for any purpose other than that of a dwelling for one private family, and alterations of any existing building for any purpose other than that of a dwelling for one private family."

"This practically means, if the bill goes through, that a private family can't have a boarder," said Mr. Hanna. "Rather drastic, I believe. It would be pretty hard on some people."

Clause twelve gave a city with over 100,000 population, meaning Toronto, only, full power to designate the width of any street. The present act requires a width of 66 feet. This, too, was pretty far-reaching, thought Mr. Hanna.

When the Provincial Secretary had concluded his onslaught, Sir James Whitney took up the attack. Mr. Gooderham's bill, said the Premier, might pit one city against another. Toronto would be the only city affected by such legislation, as it was the only one with 100,000 inhabitants. Regarding the clause to compel the placing underground of all wires, he said: "If this legislation is allowed to pass, we might as well give up all pretence of private rights and the protection of private property in this country. I am sure there will be no voice in support of it."

One clause which miraculously passed muster in the South Toronto member's bill was that relating to the erection of spite fences, of which Toronto residents have suffered considerably.

W. D. McPherson's bill respecting town planning, was sent to the municipal committee in company with a bill on the same subject introduced

Liverpool Wheat Future—Chicago Higher—Live—Latest Quotations

CHICAGO, March 18.—Two-day frightened short wheat. The coal strike threatened interfere with grain supplies pool caused one alarm, the lowered a rumor of a naval blockade might close the Dardanelles. CATTLE MARKETS

Union Stock Yards.
TORONTO, March 18.—Re live stock at the Union Stock Yards 87 carloads, consisting cattle, 204 hogs, 94 sheep, calves.

Exporters.

There were no cattle bought for purposes, but there were a few export weights, the bulk of which was bought by Messrs. Kennedy & Co. for the Montreal market. Tolls, at prices ranging from \$6.00 to \$6.25 to \$6.50.

Butchers.

Best heavy steers for butcher poses sold as high as the export to \$7.05; prime picked lots of weights, \$6.75 to \$6.95; good, \$6.50 to \$6.75; medium, \$6.25 to \$6.50; common, \$6.00 to \$6.25; inferior, \$5.75 to \$6.00. A very heavy weight brought more, as seen by sales reported.

John C. Ross, who shot Robert Fitzsimmons at Montreal, has been found guilty of manslaughter.

General Sheng Jun is marching on Peking with ten thousand troops to endeavor to restore the emperor to the throne.

Prohibition workers were defeated in the town of Chateaugay, near Montreal, where a referendum vote on the liquor question was taken yesterday.

A painting valued at \$1,500, coming from Toronto to the Buffalo Academy of Fine Arts, was totally destroyed at the Tenth street depot, Niagara Falls, yesterday.

The jury at Columbus, O., returned a verdict of guilty in the case of State Senator L. R. Andrews, charged with having accepted a bribe in connection with insurance legislation.

Richard Grigg, who for four years was British trade commissioner in Canada, with headquarters at Montreal, has been appointed trade commissioner for Canada, at a salary of \$5,000 a year.

It is claimed that the Kingston Penitentiary is five guards short on the staff, and in view of the attempt at escape of four desperate prisoners at Toronto, there is an agitation to have the vacancies filled at once.

Mother Ignatia, who had been for 52 years connected with the order of Loretto and until two years ago mother superior, died Tuesday morning in Loretto Abbey, Toronto, after a long illness. She was 60 years of age.

FRIDAY.

Several streets in Montreal bearing English names have been re-christened with French names.

Cornelius O'Brien, a patient at Peterboro' Hospital, committed suicide by throwing himself from a window.

Rev. D. Catanach of Dauphin, Man., lost his life while trying to rescue a little boy from a burning house.

A prominent London (Eng.) banker, Francis Jane of Barclay's Bank, has been arrested on a charge of robbing the bank of several thousand pounds.

J. J. Walsh of Hamilton, recently acquitted of a charge of theft, has lodged a complaint with the Attorney-General against Police Magistrate Jelfs, who tried the case.

The jury which has been trying the case of the Government against the so-called bath-tub trust in the federal court at Detroit, failed to reach an agreement and was discharged.

John Hunker, a fireman, was killed, and Wm. L. Love was fatally crushed yesterday when the high tower of the Butler County court house at Hamilton, Ohio, in which they were fighting a fire, toppled inwards, burying them.

Hon. Mr. Turgeon is in communication with the Governments of the other western provinces with the object of having one representative from them all when the stated case on the ne temere decree is to be argued before the Privy Council.

Canadian missionary circles are

taking a personal and eager interest in the march towards Peking of the Royalist army of 10,000 soldiers. It may pass through the portion of the Province of North Honan, where twenty Canadian Presbyterian missionaries have their stations. This would involve the danger of violence.

SATURDAY.

The chief analyst of the Dominion has issued a warning against the use of headache powders.

The family of W. H. Oram had a narrow escape from their burning house at London, Ont.

Gen. Baden-Powell, originator of the Boy Scout movement, completed his

train which left Salisbury, N.B., for Albert Saturday passed over the big steel bridge across the Petitcodias, it collapsed, three spans being swept away by the ice and freshet. The train was crowded.

TUESDAY.

R. B. Kessen, general manager of the Bank of New Brunswick, has resigned his position.

Over ten thousand immigrants have passed through Montreal in the past week, most of them going through for the far west.

Ottawa will have one of the finest drill halls in the Dominion, if the plans of the Department of Public Works go through.

Chief John B. Conlon of the New York fire department, after inspection, states the Calgary department is the best on the continent.

The London City Council last night turned down the offer of the London Electric Co. to light the city streets for \$22,000, in favor of Hydro.

Bombs dropped from an aeroplane belonging to the Italian expeditionary force in Tripoli caused the deaths of ten Arabs in a Turkish camp yesterday.

William St. Pierre Hughes, accountant of the prison, and brother of Hon. Sam Hughes, has been recommended for the governorship of Kingston Penitentiary.

The sum of \$10,000 has been collected by the woman's Alumnae Association of Queen's University for the new residence to be erected for the girls of Queen's.

The Intercolonial Railway will, on April 1, adopt in Quebec the system of ticket collectors on express trains, leaving to the conductors the duty only of looking after their trains.

It learned on good authority that the Canadian Northern is negotiating for the erection of a mammoth new bridge over the Niagara River a short distance above the cantilever bridge.

"It is the first the Government has heard of it," said Premier Borden yesterday, when questioned as to the report that the Quebec bridge construction is to be abandoned and a car ferry substituted.

The posse of eight men, headed by Detective Lee Felts, who spent a night in the mountains searching for the Allen clansmen, returned to Hillsboro, Va., yesterday without having arrested any of the outlaws.

Says Ottawa Ill-Treats French.

Ottawa, March 19.—Rev. Father Guertin, parish priest of Hull, comes out with a strong article against Hull being included in the proposed federal district with Ottawa.

He states that the French-Canadian minority in the capital city have been subjected to unfair treatment in the past, referring especially to the fact that, according to the agreement which long existed, the right of a French-Canadian to the mayoralty should have been respected.

Threshing In Saskatchewan.

Winnipeg, March 19.—In sections of Saskatchewan some threshing is going on where the wheat has been in the fields all winter, just as it left the binding machine, and fair results are being derived, grinding six and feed wheat, which to-day is worth 60c. and 53c. a bushel respectively.

Heavy "Union" Vote In Brockville.

Brockville, March 19.—The first church of Brockville, the largest Presbyterian Church in this presbytery, voted 456 to 30 in favor of organic union, and 429 to 24 in favor of the basis of union with the Methodist and Congregational Churches.

Ontario residents have suffered considerably.

W. D. McPherson's bill respecting town planning, was sent to the municipal committee in company with a bill on the same subject introduced by Mr. Ellis of Ottawa West, and they will be revised.

Interprovincial registration in medicine throughout the Dominion is proposed by an amendment introduced by Dr. Jamieson, South Grey, to amend the Medical Act. The new amendments are to bring into force the Roddick bill, which means "reciprocity" in medicine between the provinces.

Another amendment introduced by Dr. Jamieson is to place such restrictions and conditions on the practice of osteopathy as seem desirable to the medical council. The osteopaths have been clamoring for recognition and for the legalizing of their profession. The amendments proposed will grant their requests, but under such conditions as will compel them to spend some years in study and pass such examinations as will place them on a much higher plane than at present.

To provide \$400,000 for the erection of a provincial museum was the substance of a bill introduced by Hon. Dr. Pyne and given its second reading. The Minister of Education said that a museum had got to be a necessity because of material being scattered in different places throughout the city, with no proper accommodation. An institution of the sort would also be a great educational asset. The University of Toronto would provide the site and the rest of the cost would be split up between the university and the Government.

New Excise Tax Bill.

Washington, March 19.—Oscar W. Underwood, Democratic leader of the House, supporting the proposed excise tax bill in the House yesterday, charged that the Supreme Court by its annulment of the income tax in 1895 was responsible for the growth of socialism in the United States.

The pending measure, which probably will pass the House to-day, is expected to raise between fifty and sixty million dollars a year in revenue for the Government. Multi-millionaires, Andrew Carnegie, J. P. Morgan, and John D. Rockefeller, would be compelled to pay their full share of taxation under its terms, the Democratic leader declared.

He's Senator Daniels Now.

Ottawa, March 19.—Dr. J. W. Daniel, ex-M.P. for St. John, N.B., was yesterday called to the Senate to replace Hon. Josiah Wood, appointed Lieutenant-Governor of New Brunswick.

The new Senator was born at St. Stephen, N.B., in 1845, and entered the House at a bye-election for St. John City in 1904. At the general election that year he was returned, and also in 1908. In the September elections he ran for the city and county constituency of St. John and was returned, but resigned shortly afterwards to provide a seat for New Brunswick's Cabinet Minister, Hon. Mr. Hazen.

Will Promote Efficiency.

New York, March 19.—Leading manufacturers and business experts of the country gathered here yesterday to organize the Efficiency Society, whose purpose it is to develop increased efficiency and skill in commercial and industrial enterprises.

President Taft and his Cabinet, together with the leading bankers and manufacturers of the country, are supporting the organization which is the first of its kind.

posses sold as high as the export to \$7.05; prime picked lots of weights, \$6.75 to \$6.8; good, medium, \$6.50 to \$6.60; common, inferior, \$4.50 to \$4.90; heavy, sold from \$3.50 to \$3.85; a very heavy weights brought more, seen by sales reported.

Stockers and Feeders.

We only heard of one lot which were sold by C. Zeagm 19 steers, 800 lbs. each, at \$5.2

Milkers and Springers.

Receipts of milkers and springers and generally of inferior and medium quality. Trade for milk and prices ranged from each; they were bought by Rowntree.

Veal Calves.

Veal calves were in good demand from \$5 to \$5.50 per cwt.

Sheep and Lambs.

Sheep, ewes, sold from \$4.1 cwt.; rams, \$3.50 to \$4.50; lambs, \$3, and one extra choice lot sold at \$4.50.

Hogs.

W. J. Johnston quoted selected watered, at \$7.50, and \$7.15, to drovers at country points means that the farmer would cwt.

Montreal Live Stock.

MONTREAL, March 18.—At End Market the receipts of live stock ending March 16, were 125 sheep and lambs, 225 calves. The supply on this morning for sale consisted of 40 sheep and lambs, 130 calves.

During the early trading a \$7.50 per cwt. was asked for choice steers, weighing 1250 which figure buyers refused to result in bringing sellers' views somewhat and finally made at \$7.15 and \$7 was paid weighing 1125 lbs. each, and \$ for 900 to 1000 lb. beasts, while of choice quality sold at \$7.25 cwt.

The condition of the market and cows was unchanged as of such was ample to fill all requirements and the top prices realized \$5.50 to \$5.75 per cwt. The demand principally for good to choice as the offerings of such were buyers in some cases found it to fill their wants, altho bids made freely for full loads. The common and inferior stock the demand for such being very light.

The strong feeling which has characterized the market for hogs continues to be the main feature and prices to-day scored an advance of 15c to 25c per cwt. the small supplies coming to the keen demand for the same. In consequence an active done and even at the higher prices in some cases could not be obtained. Sales of selected lots at \$8 to \$8.25 per cwt., weighing cars.

A stronger feeling prevailed in the market for lambs and prices advanced 25c per cwt., which was due to increased demand and the small sales were made at \$7.15 cwt. Sheep were quiet and tone of the market for calves was on account of the increase in prices and prices are steadily reaching level.

Butchers' cattle, choice, \$7.2 medium, \$6 to \$7; common, \$4.75; \$2.75 to \$3.25; choice cows, \$5.75; medium, \$4 to \$4.75; but \$5.75; milkers, choice, each \$6.50 and medium, each, \$4.5 to \$5.5; \$30 to \$40.

Sheep, ewes, \$5 to \$5.25; bucks \$4.25 to \$4.50; lambs, \$7 to \$7.25.

Hogs—F.o.b., \$8 to \$8.25. Calves—\$1.50 to \$10.

Stopped Runaway by P.

Prescott, Ont., March 19.—A telephone line near Maynard village north of Prescott, at C. Dales and child of North from a runaway accident Sunday.

A farmer seeing the runaway horse, rushed to the aid and calling up his next neighbor to run out and stop the

HE PROPOSES A TRUCE

**Churchill Invites Germany to
Saw-Off on Shipbuilding.**

**His Suggestion Is That Britain and
Germany Build No Dreadnoughts
In 1913—Sir Gilbert Parker Raises
the Question of Canada's Share In
Imperial Defence—Asks for News
From Mr. Borden.**

London, March 9.—Winston Churchill, First Lord of the Admiralty, yesterday introduced the naval estimates for the coming year in the House of Commons. The appropriations called for amount to \$220,427,000, a decrease of \$1,535,000 from the amount spent last year.

The First Lord accompanied the introduction with a straight talk to Germany, promising an augmentation or a retardation of British naval construction to correspond with Germany's naval program.

He said, he regretted the necessity of referring specifically to Germany, but continued:

"The Germans are a people of robust minds, whose strong masculine good sense and high courage do not recoil from, and are not offended by plain, blunt statements of fact, if they are expressed with courtesy and sincerity."

Mr. Churchill then went on to tell of the conditions under which naval competition would be carried on during the next few years.

He prefaced his remarks by the statement that the "two to one" standard was not necessary at present, although it would possibly become so.

"The 'two-power standard' has been extended by some of its supporters," continued Mr. Churchill, "to include the United States and by this means it has lost both good sense and reality."

The First Lord laid down a 60 per cent. superiority in battleships and battle cruisers of the Dreadnought type, as compared with the German navy, as a convenient basis for the next four or five years. He pointed out that Great Britain at present possessed an enormous superiority in pre-Dreadnought vessels, but as these declined in fighting value, the British ratio of new construction would have to rise above the 60 per cent. standard.

Mr. Churchill said that it would be necessary for Great Britain to construct four and three Dreadnoughts every year alternately for the next six years.

The First Lord continued: "This is our position, that the Germans will not be gainers in naval power by any increases they may make and will not be losers from the basis I have laid down by any diminutions."

"Here is a perfectly plain plan and arrangement by which, without diplomatic negotiations, without bargaining, without the slightest restriction of the sovereign freedom of either power, this keen and costly naval rivalry can at any time be abated."

During the discussion of the navy estimates last night Sir Gilbert Parker said he regretted the First Lord had omitted to take notice of one aspect of the naval policy. This was the co-operation of overseas dominions, and he invited the right hon. gentleman to say whether the Government had any further information

BOURASSA IN TORONTO.

**He Tells Irishmen Quebec Will Not
Stand Any Humiliation.**

Toronto, March 19.—References to the Keewatin school question and the action of the Borden Government roused Henri Bourassa to enthusiasm at the St. Patrick's Day assembly of the A.O.H. in Massey Hall last night, and his voice was husky with emotion as he described how the educational systems of the provinces were to be conducted by the provinces, after the solemn pledge of the crown had been given and ratified by an act of Parliament that the rights of the minority were to be preserved in every province of the Dominion.

"Gentlemen of Toronto," he pleaded, "I appeal to your straightforwardness and manliness to say that a solemn compact made by the Parliament of Canada should be preserved. (Applause.)"

"Would you call those schools 'national' in which the minority are imposed upon by the majority — when those so-called schools deprives your children of what may be called their birthright?"

From Mr. Bourassa's description of it, the so-called alarming reference of a leading Toronto daily to the effect that there are 157 schools in Ontario in which the French language alone is used on the playgrounds, was worthy of ridicule.

"Why, in that obscure, barbarous and mediaeval Province of Quebec," said he, "we learn to speak in both languages. We are very antiquated, I know, but I tell you frankly we are going to remain that way." At this stage of his discourse, Mr. Bourassa waxed particularly eloquent.

"I like to speak," said he, "in the language of the majority of the people of this country. I like to imbibe the great literature of the English language and read what the great British statesmen have said, but I also want to tell the majority of the people of Canada in their own language that neither I nor my race will stand for any humiliating treatment in the Dominion of Canada." (Applause.)

U. S. War Vessels To Co East.

Washington, D.C., March 19.—The armored cruisers California, South Dakota, and Colorado, under command of Rear Admiral Southerland, sailed yesterday for Honolulu and the Philippines.

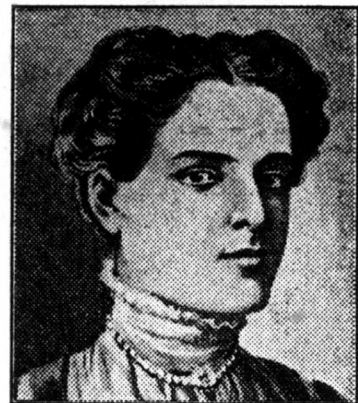

Notwithstanding the international significance that is attached to this sudden and considerable reinforcement of the American Asiatic fleet, the naval officials here state that the purpose of the cruise is to enable them to dock at the naval station in Olongapo, and to hold their spring target practice in Philippine waters.

It is rather naively admitted that the practice might be held off the Southern California coast, but then the cruisers would be a long way off from the seat of trouble "if anything should happen in the Far East."

DOCTORS HAD GIVEN UP ALL HOPE

"Fruit-a-tives" saved my Life

RIVIERE A PIERRE, Q., May 9, 1910.
"I look upon my recovery as nothing short of a miracle. I was for eleven years, constantly suffering from Chronic Dyspepsia and Indigestion. I was treated by several doctors and they simply did me no good. During the latter part of my illness, I was so thin that I weighed only 90 pounds, and I vomited everything I ate."

"The doctors gave me up to die as the stomach trouble produced heart weakness and I was frequently unconscious. I received the Last Rites of The Church."

At this time, a lady strongly urged me to try 'Fruit-a-tives'. When I had taken one box, I was much better and after three boxes, I was practically well again, and had gained 20 pounds. I have taken 73 boxes in all and now weigh 150 pounds and am well."

Madame ARTHUR TOURANGEAU.
"Fruit-a-tives" is the only medicine in the world made of intensified fruit juices and always cures Indigestion. 50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers, or from Fruit-a-tives Limited, Ottawa."

Intention Good.

"Can he play poker?"
"No."
"Then what is he doing in that crowd so much of the time?"
"Just trying to."

Natural Query.

"Mrs. Green declared that Mrs. Blank is a perfect lady at the club yesterday."

"What was the charge against her?"

had omitted to take notice of one aspect of the naval policy. This was the co-operation of overseas dominions, and he invited the right hon. gentleman to say whether the Govern- ment had any further information as to the intended policy of the Prime Minister of Canada and his Govern- ment with respect to the imperial naval policy. It was because the dominions thought their efforts were de- spised that they hadn't co-operated in a more effective, substantial form.

Norton Griffiths said there was un- doubtedly a belief in distant parts of the Empire that their co-operation was looked upon as of small consequence, and he hoped the First Lord would make some 'precise, clear statement that the Admiralty did welcome the co-operation of the dominions. It was a cry often heard in Canada that if co-operations of the Dominion was desired they should have some repre- sentation.

Canadian Ministers were shortly expected in the country and he urged they should be sent back with a mes- sage to assure Canadians that the Ad- miralty wanted their co-operation and would give them some representation. Such a message would make their work much easier.

Jap Sailor Is Shot.

Swatow, China, March 19.—A de- tachment of marines from the United States monitor Monterey was landed here yesterday in consequence of the continuous disturbances all over the city.

Heavy fighting between the Kakka tribesmen and the troops from Canton went on for eight hours yesterday in the streets of the city. Forty natives are known to have been killed. A shot from one of the combatants, who were firing wildly, killed a bluejacket on board a Japanese warship in the harbor.

Twenty-Five Men Killed.

San Antonio, Texas, March 19.— Twenty-five men were killed by the explosion of a locomotive boiler in the Southern Pacific round house here yesterday forenoon. Many more were injured.

Most of the dead and injured were strikebreakers, who took the places of Southern Pacific shopmen, who went on strike here several months ago.

So fearfully mangled were several of the bodies that it seemed probable they can never be fully identified.

Home Rule In Two Years.

London, March 19.—John E. Red- mond, member of the Irish Parlia- mentary party, presiding last night at a St. Patrick's banquet at the Hotel Cecil, said that the home rule bill would pass the House of Commons by more than 100 majority, and inside of two years would become law. Ireland, then, he declared, was destined to become the greatest human agency in promoting the security and power of the British Empire.

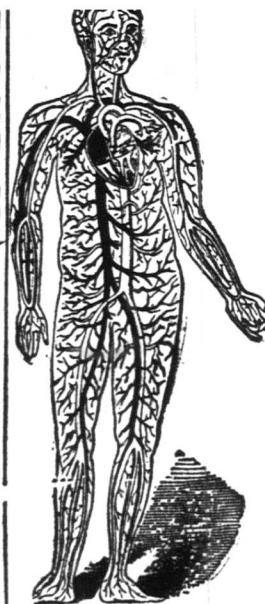

Ambiguous.

"Whom did he marry?"
"A farmer's only daughter."
"Is she beautiful?"
"Yes. The farm has about a thou- sand acres."

Some Weeks Later.

Well, do you think you win the bet
With some degree of ease?
Good resolutions working yet?
Sit up and notice, please.

The meeting is open for the public, the entrance is free and everyone will be welcome.

Mrs. Wm. Fretts.

Mrs. Lydia Fretts died at the residence of Mr. Desmore Davis, Robert street, Napanee, on Tuesday, March 19th, at 2 p. m. She knew her end was approaching and was quite resigned to go and frequently expressed a desire to depart and be with Christ, which was far better. She was converted in early life and lived a consistent christian life. She loved the House of God and was regular in her attendance. Her husband predeceased her many years ago. She leaves to mourn her loss, one brother, Mr. J. L. P. Gordanier, of Morven. In the absence of her pastor, Rev. J. P. Wilson, the Rev. G. W. McColl, of Trinity church, visited her and conducted the funeral service on Thursday, the 21st, at 2 o'clock, thence to the vault at Morven.

If its anything in "Dyes," we have it for you. Dyola, Diamond, Turkish, or Maypole, Extract Logwood, Japonica, etc. In all latest shades of color. at The Medical Hall—Fred L. Hooper.

Ladies Musical Club.

Those who did not attend the Musicales last Friday afternoon missed more that was beautiful than we have time to describe. Mrs. Black and Miss Frizzell opened with two piano duets and selections from Grand Opera, which they executed in an exceedingly pleasing manner. Also Mrs. VanLoven appeared again with a number of varied selections that charmed every listener. Her voice was in fine conditions and entirely equal to the most exacting demands. Of all she sang from the trying operatic selections to the little Ghosts every song was rendered with great ease and charm. The gems of the program were Ave Maria from Verdi's Otello, Caracciolo's Poor Lena, and Reed Miller's from the depths, Haile's Moonlight. Miss Wood, a new

BOYLE & SON.

Mr. Walter Boyes has purchased the grocery business from Mr. W. A. Thompson.

Dr. G. H. Cowan was appointed Medical Health Officer by the council on Monday evening.

The regular monthly meeting of the W. C. T. U. will be held in the Board Room of the Public Library, Tuesday, March the 26th, at 3 o'clock.

Napanee was visited on Thursday by a blizzard. The country roads are pretty well blocked, and all traffic on railroads were from one half to two hours late.

R. J. Hooper, Strathcona, passed through Kingston on Monday on his way to Perry, N. Y. He is driving the whole distance, 450 miles, with a team and cutter.

The Contract for the new C. P. -R. Railway from Glentoe to Leaside Junction has been let to Messrs. Duks & Hinds, Toronto. The new line will pass through Enterprise, Forest Mills, and Croydon.

Jas. Gordon has still a good number of excellent and helpful books on hand besides his usual supply of the late books, all at reduced prices. Also Bibles, Hymn and Prayer Books, Choir Books, Sabbath School Helps, etc. Call and see him, Centre street, west of market.

Mr. C. A. Walters, local manager of the Seymour Power and Electric Co., Limited, informed us that on Saturday he expected that a change would be made and connection made with the sub-station on the Selby road. This means that direct current will be received from the Trent river, and the steam plant will be shut down.

Wonderland opened on Monday evening last after having been closed for some time undergoing extensive repairs and changes. Monday, Tuesday and Wednesday evenings, besides the usual first-class entertainment of moving pictures, etc., the proprietor provided for his patrons a first-class vaudeville show given by a Scotch family of five people. So pleasing were these performers that Mr. Foster engaged them for the balance of the week. Don't miss the matinee on Saturday afternoon.

VERY LOW RATES AND SPECIAL TRAINS FOR HOMESEEEKERS.

Those taking advantage of the Homeseekers' Excursions should bear in mind the many exclusive features offered by the Canadian Pacific Railway in connection with a trip to the West. It is the only all-Canadian route. Only line operating through trains to Western Canada. No change of depots. Only line operating through Standard and Tourist Sleepers to Winnipeg and Vancouver. All equipment is owned and operated by Canadian Pacific Railway, affording the highest form of efficiency. Dining car service unsurpassed.

Homeseekers' rates will be in effect April 2, 16, 30, May 14-28, June 11-25, July 9, 23, Aug. 6, 20, Sept. 3, 17, and round trip second-class tickets will be issued via Canadian Pacific Railway from Ontario points at very low rates for example, Winnipeg and return \$34.00, Edmonton and return \$42.00, and other points in proportion. Return limit 60 days.

For the accommodation of Canadian Pacific Railway passengers a special train will leave Toronto 2.00 p.m. on above dates, comprised of Tourist and Colonist Sleepers. Colonist Sleepers may be occupied free of charge. Passengers, however, must provide their own bedding. Tourist Sleeping cars will be operated through to Edmonton via Saskatoon, also through to Winnipeg and Calgary. A moderate charge is made for berths in Tourist cars.

Both Tourist and Colonist cars are provided with cooking ranges, which trainmen have instructions to keep in condition. Full particulars from any Canadian Pacific Railway agent. Ask for copy of Homeseekers' Booklet.

P. GLEESON.

A pane of glass stops a draft of air, and a draught of Merrill's Wizard Lightning stops any pain inside or out in five minutes. Price 25c.

Sold and recommended by T. B. Wallace, Druggist.

The little Ghosts every song was rendered with great ease and charm. The gems of the program were Ave Maria from Verdi's Otello, Caracciolo's Poor Lena, and Reed Miller's from the depths, Haile's Moonlight. Miss Wood, a new comer, sang delightfully all her difficult songs. Her voice is one of great promise, a rich contralto with every requisite desirable for a fine success. Mr. Atwood, already a favorite, was at his best, his beautiful voice, genial manner and attractive personality always win for him a success he certainly deserves. We certainly expect to hear great things of the young man. One keen disappointment was the fact that Mr. Powers did not sing alone. His voice rang out so gloriously in the concerted numbers and this only created a desire to hear more. Miss Van-Luven officiated as accompanist in a surprising manner in most difficult and astonishing accompaniments.

Mr. R. and's work.

The literary committee of the Ep-
worth League furnished a very unique
programme for the literary meeting
on Monday evening. Mr. Fraser of
the Standard Bank, gave an address
on the 'High cost of Living.' Mr.
Swartz pleased the audience with a
selection from the violin. Miss Lillian
Embury gave a piano solo. Mr.
Demille gave a short address.

Special services are being held in
the Presbyterian Church every even-
ing this week.

Mrs. T. B. Wilson and daughter,
Miss Beth, returned to the village on
Thursday of last week after a three
months' visit in Winnipeg.

Mrs. Hope left on Monday for
Winnipeg, to reside with her daugh-
ter, Mrs. S. Littlewood.

Mr. and Mrs. Jay S. Yeomans were
in Deseronto on Thursday of last week.

Miss Mable Weese, of Centreville, is
assisting our milliner, Mrs. Wartman.

Mr. William Dunn, our station agent,
is to be transferred to Yarker and Mr.
Freeman will be stationed here.

The death of Mrs. Bernard Kennedy
took place on Tuesday morning, March
19, at the home of her mother, Mrs.
Files. She had been ill for some time,
her trouble being tuberculosis. She
leaves to mourn her loss, a mother,
four sisters, Mrs. Holmes, of Peter-
boro, Mrs. Wood, Mrs. Guller and Mrs.
Hamilton in the village here, also two
brothers, one of whom resides in New-
burgh.

Mrs. Roy Pybus, of Port Colborne,
spent a few days of this week with
Mrs. E. Madden and family.

NEDA COUGH RELIEF guaran-
teed to cure a cough. All you

MACDONALD.

Mr. and Mrs. W. Goodman enter-
tained a number of friends one even-
ing last week.

Quite a number from Bardolph and
Macdonald assembled at the home of
Mr. and Mrs. Jas. Keech, "The Pines,"
and presented them with silver knives
and forks in token of the esteem in
which they were held during their re-
sidence at this place.

Miss Pansy Galt, under the doctor's
care for the past few days, is much
improved.

Mrs. Blake Huyck is at her mother's,
Mrs. M. A. Miller's ill of inflammatory
rheumatism. She has not been able
yet to go to her new home at Bay
Centre.

Mrs. Garrison, of Parma, is spend-
ing this week with her sister, Mrs.
Hume.

Mrs. Luther Hawley spent Saturday
till Tuesday last with her sister, Mrs.
W. J. Black, of Napanee.

Mrs. Hume and Mrs. Garrison were
guests of Mrs. Herbert Martin on
Wednesday.

Mr. and Mrs. Augustus Keech are
visiting in Deseronto.

Percy and William Brooks are in
this vicinity with their gasoline out-
fit and a goodly number are having
their wood cut.

Rev. Nickle is conducting special
services in Bethany church.

The Excelsior factory milk routes
were sold on Monday. Chas. Rom-
bough has the Macdonald route and
Joseph Hicks the Bardolph route.

For horses and cattle we have a
